**Review of Public Data Use** ,1982    Information Systems Maria Papadaki,Marinos Themistocleous,Khalid Al Marri,Marwan Al Zarouni,2024-03-29 This book constitutes selected papers from the 20th European Mediterranean and Middle Eastern Conference EMCIS 2023 which was held in Dubai UAE during December 11 12 2023 EMCIS covers technical organizational business and social issues in the

application of information technology and is dedicated to the definition and establishment of Information Systems IS as a discipline of high impact for IS professionals and practitioners. It focuses on approaches that facilitate the identification of innovative research of significant relevance to the IS discipline following sound research methodologies that lead to results of measurable impact. The 43 papers presented in this volume were carefully reviewed and selected from a total of 126 submissions. They were organized in topical sections as follows: Part I: Metaverse, blockchain technology and applications; digital governance; healthcare information systems; artificial intelligence; Part II: Big data and analytics; digital services and social media; innovative research projects; managing information systems; smart cities.

**Mathematical Models for Decision Making with Multiple Perspectives** Maria Isabel Gomes, Nelson Chibeles Martins, 2022. This book brings together in a single volume the fields of multicriteria decision making and multiobjective optimization that are traditionally covered by different books. It is written in a didactic form using examples to help understanding of the proposed methodologies better.

*River of Promise, River of Peril* John E. Thorson, 1994. Snaking 2,540 miles from Montana to the Mississippi River, the Missouri is the longest waterway in the nation. Its basin stretching 530,000 square miles extends broadly into ten states and twenty-five Indian reservations. For millions of years the river and its tributaries meandered untamed. But that irrevocably changed with the passage of the Pick-Sloan Plan, part of the Flood Control Act of 1944. In *River of Promise, River of Peril*, John Thorson takes the first comprehensive look at how and why the Missouri River basin, now with six major dams and hundreds of miles of navigation canals, has become one of the most significantly altered drainage systems in the country. He also looks at the consequences. The Pick-Sloan Plan, he argues, has not fared well over time, particularly in its failure to provide an effective blueprint for regional river management. Persistent conflicts over the river, he contends, illuminate important weaknesses of federalism in dealing with regional resources, the most glaring being the exclusion of any proactive role for Indian tribal governments. To support his argument, Thorson examines the physical, demographic, and political features of the river basin, analyzes the comprehensive river development that gave birth to the Pick-Sloan Plan, reveals why the original goals of the legislature were never achieved, explores the deep-seated and continuing tensions between basin governments and investigates how Indian tribes, the river's ecology, and federalism have been damaged as the river has been developed. He also describes the various associations created and later abandoned from the sixties to the eighties and assesses their virtues and limitations. Thorson sees in the story of the Missouri River Basin the vertical and horizontal strains of federalism, the states chafing against federally mandated and controlled projects exacerbated by the lack of constitutional guidance for handling conflicts among neighboring states and with Indian nations. Not just bent on spotlighting problems, Thorson also evaluates different approaches for improved river system management and recommends a Missouri River management institution based on environmentally sensitive policies, a strong state role, and full participation by the basin's tribal governments.

Teachers' Decision Making in EFL Classroom Zhang

Youwen,2017-07-17 Master s Thesis from the year 2017 in the subject Didactics for the subject English Pedagogy Literature Studies language English abstract This research attempts to make its contribution to the growing sociolinguistic literature on classroom foreign second language learning and teaching It reports a comparative ethnographic inquiry into the similarities and differences of decision making and decision making process employed by two categories of teachers when approaching planning and instruction in the language classrooms in Chinese EFL teaching context And the thought provoking reasons for these similarities and differences have also been explored through the analysis of a range of broad research questions i e first how do two sets of teachers approach instructional decisions in the similar settings second can we have access to the similarities and differences between their instructional decisions third what factors might affect their pedagogical decisions and fourth are their instructional decisions consistent with their theoretical ideas Two categories of teachers consist of five Chinese TEL and five western teachers respectively who work in two similar teaching institutions in China The selected basic data gathered through a sequence of survey observations and particular information elicitation techniques consist of the running accounts of observation lesson plans and over fifty hours of audio recording of class sessions and interviews Through analysis of selected lesson excerpts and teachers comments on these data we identify similarities and differences in the classroom interpretation of the tasks and participation structures that these teachers adopted in their instruction and the underlying reasons behind them with reference to beliefs context prior experiences and culture The most general conclusion is that whether they emphasize accuracy or fluency and whether they prefer student centered instruction or teacher centered they tend to capitalize on these theories eclectically though they do differ in the extent to which they stress one focus or another Therefore much of a teacher s decision on planning and instruction resides in the way he she interprets the teaching setting and acts on the information from the ongoing classroom interactions In the last two chapters of this book the subject of teacher s decision making is explored from the perspective of soft power and critical discourse analysis so that teachers decision making research can be considered more deeply in the aspect of cognitive discourse and linguistic philosophy
