Race and Gender in Modern Western Warfare David Ulbrich, Bobby A. Wintermute, 2018-12-03 This book fills a gap in the historiographical and theoretical fields of race gender and war In brief Race and Gender in Modern Western Warfare RGMWW offers an introduction into how cultural constructions of identity are transformed by war and how they in turn influence the nature of military institutions and conflicts Focusing on the modern West this project begins by introducing the contours of race and gender theories as they have evolved and how they are employed by historians anthropologists sociologists and other scholars The project then mixes chronological narrative with analysis and historiography as it takes the reader through a series of case studies ranging from the early nineteenth century to the Global War of Terror The purpose throughout is not merely to create a list of so called great moments in race and gender but to create a meta landscape in which readers can learn to identify for themselves the disjunctures flaws and critical synergies in the traditional memory and history of a largely monochrome and male exclusive military experience The final chapter considers the current challenges that Western societies particularly the United States face in imposing social diversity and tolerance on statist military structures in a climates of sometimes vitriolic public debate RGMWW represents our effort to blend race gender and military war to problematize these intersections and then provide some answers to those problems
