## **Paideia Problems And Possibilities:**

*Paideia Problems and Possibilities* Mortimer Jerome Adler, 1983      *Paideia Program* Mortimer J. Adler, 1984-11 Third vol of the author's trilogy the 1st of which is *The Paideia proposal* and the 2nd of which is *Paideia problems and possibilities*

*The Paideia Program* Mortimer Jerome Adler, 1984-01-01 Third vol of the author's trilogy the 1st of which is *The Paideia proposal* and the 2nd of which is *Paideia problems and possibilities*      **Urban and Suburban/rural Special Strategies for Educating Disadvantaged Children**, 1997      **The Educated Person** D. G. Mulcahy, 2008-03-27 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person. Seen at one time as a matter for colleges and universities, over the years it has become central to the debate surrounding general education in high school and even the earlier grades. Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct. In what way might it speak helpfully to educational challenges we face today? In what ways does it still speak helpfully to educational challenges we face today? In what ways might it be a guide as we search for a better way forward? These are the central questions that are addressed in this book. In doing so, the positions of three theorists—John Henry Newman, Mortimer J. Adler, and Jane Roland Martin—who have written about liberal education in a compelling way and from different perspectives are selected for close analysis. The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education.

*Parents, Children, and Communication* Thomas J. Socha, Glen H. Stamp, 2013-11-05 This is the first edited volume in the communication field to examine parent-child interaction. It creates a framework for future research in this growing area: family communication and more specifically parent-child communication and also suggests new areas of communication research among parents and children: cultural work, related taboo topics, family sex discussions, conflict, and abuse. Chapter authors provide thorough coverage of theoretical approaches, new methods, and emerging contexts, including lesbian/gay parent-child relationships. In so doing, they bring a communication perspective to enduring problems of discipline, adolescent conflict, and physical child abuse. The text highlights various methodological approaches, both quantitative and qualitative, including conversation analysis, grounded theory, participant observation, and phenomenological interviewing of children. It also introduces and surveys various theoretical approaches: general systems, developmental, cultural, and intergenerational transmission.      *Encyclopedia of Educational Reform and Dissent* Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform, and to a lesser extent educational dissent. Consider the present: you have various forms of privatization, school choice, the No Child Left Behind act, home schooling, value-added accountability, alternative teacher preparation programs, on-line instruction, etc. This range of activity is not exceptional. For instance, consider the past: progressive education, open education, the junior high school, the middle school, Life Adjustment education, career education, vocational education, the comprehensive high school, school-to-work, year-round schooling, behavioral objectives, proficiency

exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily

**Basic Education** Council for Basic Education,1987 *Future Survey Annual* 1983 Michael Marien,1984-01-01 **Patterns of Educational Practice** Richard W. Morshead,1995 **Nonachieving Students at Risk** Harry Wendell Sartain,1989 Discusses the need for school family and community intervention for nonachieving students Hearings on the Equal Access Act United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education,1984 **Review Journal of Philosophy & Social Science** ,1989 **Philosophy Social Science And Education** James J. Van Patten,1989\* **Redesigning Schools** Joseph P. McDonald,1996-11-22 For five years McDonald charted the progress of ten schools in the Coalition of Essential Schools as they immersed themselves in the hard work of school reform He also visited many other schools both elementary and secondary in an attempt to understand serious school reform and its prospects He concludes that school reform requires redesign in three critical areas The first is a shift in the ordinary and often tacit beliefs of the people who work in schools the communities that support them and even the children who attend them The second area which McDonald dubs the wiring arena involves internal communication and power arrangements The third area called tuning involves connecting the school to the needs interests and values of the communities it serves Notes et documents ,1992

*Improving Our Schools* Marilyn Clayton Felt,1985 The purpose of this book a comprehensive summary of the educational studies of the late 1970s and early 1980s is to make the thinking and conclusions of the studies conveniently accessible to those responsible for education at the local level To that end the book deals with 33 studies containing substantial information and advice for local action Chapter One presents excerpts from the studies that convey the tone and the subject of current concerns about the outcomes of American education Some cross cultural comparisons are included Chapter Two

discusses what the different studies see as the causes of the nation's educational problems focusing on those factors that the education community has some chance of influencing Chapter Three summarizes the findings or recommendations of each study in turn Chapter Four compares the recommendations of the full range of studies and identifies and discusses 11 areas of agreement what should be taught teaching methods media use evaluation and guidance special student populations school organization and school climate teachers principals the school plant institutions and individuals outside the school system the improvement process Chapter Five provides information and questions designed to help local educators and particularly principals find a starting point for their own improvement efforts RDN      **Health Education** ,1984      **Justice, Ideology, and Education** Edward Stevens,1987      *The Educator's Digest of Reform* Sara Lake,1984
