*Pain as Human Experience* Mary-Jo DelVecchio Good, Paul Brodwin, Byron J. Good, 1994-11-14 With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors attempt to invent new ways of writing about this language resistant human experience Focused on substantive issues in the study of chronic pain their work explores the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in *Pain as Human Experience* In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book Jacket *Pain as Human Experience* Good/Brodwin, 1994 Chronic pain challenges the central tenet of biomedicine that objective knowledge of the human body and mind is possible apart from subjective experience and social context Sufferers finding that chronic pain alters every aspect of life often become frustrated and distrust a profession seemingly unable to explain or effectively treat their illness The authors of this innovative volume offer an entirely different ethnographic approach searching out more effective ways to describe and analyze the human context of pain How can we analyze a mode of experience that appears to the pain sufferer as an unmediated fact of the body and is yet so resistant to language With case studies drawn from anthropological investigations of chronic pain sufferers and pain clinics in the northeastern United States the authors explore the great divide between the culturally shaped language of suffering and the traditional language of medical and psychological theorizing They argue that the representation of experience in local social worlds is a central challenge to the human sciences and to ethnographic writing and that meeting that challenge is also crucial to the refiguring of pain in medical discourse and health policy debates Anthropologists scholars from the medical social sciences and humanities and many general readers will be interested in *Pain as Human Experience* In addition behavioral medicine and pain specialists psychiatrists and primary care practitioners will find much that is relevant to their work in this book *Pain as Human Experience* ,1992 *Interpretations of literature*, by Lafcadio Hearn Lafcadio Hearn, 1915 *Readings in General Psychology* Edward Stevens Robinson, 1929 *Unity* ,1929 *Principles of Social Economics* George Gunton, 1897 **Cylons in America** Tiffany Potter, C. W. Marshall, 2008-01-01 With its fourth season due to air in January 2008 the award winning *Battlestar Galactica* continues to be exceptionally popular for non network television combining the familiar features of science fiction with direct commentary on life in mainstream America *Cylons in America* is the first collection of critical studies of *Battlestar Galactica* its 2003 miniseries and the ongoing 2004 television series examining its place within popular culture and its engagement with contemporary American society *Battlestar*

Galactica depicts the remnants of the human race fleeing across space from a robotic enemy called the Cylons. The fleet is protected by a single warship, the Battlestar, and is searching for a lost colony that settled on the legendary planet Earth. Originally a television series in the 1970s, the current series maintains the mythic sense established with the earlier quest narrative but adds elements of hard science and aggressive engagement with post 9/11 American politics. Cylons In America casts a critical eye on the revived series and is sure to appeal to fans of the show as well as to scholars and researchers of contemporary television. *Revelation Interpreted* Glenn Andrews Kratzer, 1915 **Essentials of Hinduism in the Light of Saiva Siddhanta** S. Sabaratna Mudaliyar, 1913 **The Christian Doctrine of God** William Newton Clarke, 1910

**The Consolations of the Cross** Charles Henry Brent, 1904 *Illness and Image* Sander L. Gilman, 2018-01-16 The humanities in higher education are too often labeled as impractical and are not usually valued in today's marketplace. Yet in professional fields such as the health sciences, interest in what the humanities can offer has increased. Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help. *Illness and Image* introduces undergraduates and professionals to the medical humanities using a series of case studies beginning with debates about male circumcision from the ancient world to the present to the meanings of authenticity in the face transplantation arena. The case studies address the interpretation of mental illness as a disability and the new category of mental illness self-harm. Sander L. Gilman shows how medicine projects such categories' existence into the historical past to show that they are not bound in time and space and therefore are real. *Illness and Image* provides students and researchers with models and possible questions regarding categories often assumed to be either trans-historical or objective, making it useful as a textbook.

**Health Humanities Reader** Therese Jones, Delese Wear, Lester D. Friedman, 2014-08-28 Over the past forty years, the health humanities, previously called the medical humanities, has emerged as one of the most exciting fields for interdisciplinary scholarship, advancing humanistic inquiry into bioethics, human rights, health care, and the uses of technology. It has also helped inspire medical practitioners to engage in deeper reflection about the human elements of their practice. In *Health Humanities Reader*, editors Therese Jones, Delese Wear, and Lester D. Friedman have assembled fifty-four leading scholars, educators, artists, and clinicians to survey the rich body of work that has already emerged from the field and to imagine fresh approaches to the health humanities in these original essays. The collection's contributors reflect the extraordinary diversity of the field, including scholars from the disciplines of disability studies, history, literature, nursing, religion, narrative medicine, philosophy, bioethics, medicine, and the social sciences. With warmth and humor, critical acumen, and ethical insight, *Health Humanities Reader* truly humanizes the field of medicine. Its accessible language and broad scope offers something for everyone, from the experienced medical professional to a reader interested in health and illness. **The Conquest of disease through animal experimentation** James Peter Warbasse, 1910 *The Medical World*, 1924 *The Tibetan Art of Living* Christopher Hansard, 2011-02-09 Christopher Hansard is a leading practitioner in Tibetan medicine and

uniquely qualified to write a comprehensive and practical book on its wisdom Inspirational and accessible in THE TIBETAN ART OF LIVING Hansard describes the principles of Tibetan medicine for ultimate mind body health and then shows us simple ways to incorporate its wisdom into our daily lives from dietary guidelines exercise mind strengthening and rejuvenation techniques to the use of herbs for common ailments This is not only a truly enlightening book but a complete resource to the practical applications of Tibetan medicine from a leading practitioner in the field     **The Boston Medical and Surgical Journal** ,1914     The Princeton Theological Review ,1919     **Veterinary Medicine** ,1920
