Painting The Screen:

The Double Screen Wu Hung, 1996-11-22 This book contemplates a large problem what is a traditional Chinese painting Wu Hung answers this question through a comprehensive analysis of the screen a major format and a popular pictorial motif in traditional China With a broad array of examples ranging from the early centuries C E to the 1800s he explores the screen's position in art as an important site for artistic imagination as an illusionary representation on a flat surface and as an architectural device defining cultural conventions A screen occupies a space and divides it supplies an ideal surface for painting and has been a favourite pictorial image in Chinese art since antiquity With its diverse roles the screen has provided Chinese painters with endless opportunities to reinvent their art The author argues that any understanding of Chinese painting must include discussion of its material forms as well as its intimate connection with cultural context and convention Thus *The Double Screen* offers a powerful non western perspective on diverse artistic and cultural genres from portraiture and pictorial narrative to voyeurism and masquerade and will be invaluable to anyone interested in the history of art and Asian studies as well as to students and specialists in the field
