**Painting the Cosmos** Carolyn Wayland,2021-12-07

For many the most important and challenging work produced by the co founder of the Theosophical Society Helena P Blavatsky is her book The Secret Doctrine In its pages one finds a sometimes poetic other times philosophic and quite often obscure description of the origin and evolution of the cosmos and humankind Painting the Cosmos offers a novel approach to connect us with the highly metaphysical concepts found in The Secret Doctrine By skillfully using the technique of abstract painting Carolyn Wayland presents a series of paintings representing the main topics dealt with in Blavatsky's work from the ultimate absolute reality to the manifested cosmos

**Painting the Cosmos** Nia Imara,2025-02-25

A stunning portrait of our vast dynamic and mysterious universe as seen through the lenses of astronomy and art What is our place in the universe Where do art and science overlap How can we use these disciplines to better understand the universe and how do they help us to shape our reality In Painting the Cosmos astrophysicist and visual artist Nia Imara combines these perspectives to comprehensively illustrate the history of the universe and our position in it In this eye opening and accessible book Imara asks pivotal questions and explores humanity's ever evolving view of nature Richly illustrated with stunning full color images of our universe and beautiful work from creators around the world particularly the often neglected work of women and Black artists this one of a kind book unites the realms of art science and culture to create a dynamic portrait of the cosmos From the Big Bang to life on other planets while also explaining the most exciting recent developments in astronomy With Imara's guiding expertise readers will explore The limits of objectivity in understanding reality The principles that govern movement in space and the role of rhythm in the universe and art How light functions as a storyteller How scientists and artists help us see the invisible from black holes to marginalized experiences The possibility of life beyond our solar system and how we
