 forced to contend with the phenomenon of suicide terrorism on almost a daily basis Such diverse countries as Turkey Sri  
 Lanka Israel and the United States have all been targeted by terrorists who effectively used suicide terrorism against densely  
 populated civilian and military targets In this volume academic experts and counter terrorism professionals compare ways  
 and means of countering the threat of suicide terrorism Suicide terrorism constitutes an additional stage in the escalation of  
 terrorist activity In his ability to implement the attack at precisely the time and place where it will cause the maximum  
 number of casualties and greatest damage the suicide bomber is virtually guaranteed success Even the least deadly of such  
 attacks succeeds in striking a devastating blow to public morale Suicide terrorism is all the more threatening because of the  
 difficulties in confronting it the large number of casualties and the religious or ideological zeal it inspires It is a phenomenon  
 that often though not always goes hand in hand with religious extremism which distorts religion in the service of political  
 aims In order to find ways of combating the phenomenon of suicide terrorism the International Policy Institute for Counter  
 Terrorism held an international conference on the subject in February 2000 at the Interdisciplinary Center Herzliya The  
 conference brought together academic experts and counter terrorism professionals from all over the world in a multi  
 disciplinary venue Lecturers included experts from Israel the Palestinian Authority Turkey Sri Lanka the United Kingdom and  
 the United States The conclusion reached was that the phenomenon of religious and nationalist suicide terrorism is likely to  
 become all the more acute in the coming years **Pratiyogita Darpan** ,2009-04 Pratiyogita Darpan monthly magazine is

Hrair Dekmejian,2007 Since 9 11 images of fanatical jihadists have become the international symbol of terrorism In the wake of the attacks journalists and academics alike have taken up the task of trying to make sense of these seemingly alien terrorist organizations Many of these sources have perpetuated the idea that terrorists are unknowable or irrational What is often missed is the degree to which terrorists have motivations that can be grasped and understood In his new text Dekmejian places terrorism within a spectrum of political violence creating a typology of terror based on scale and intent as well as by type of actor from isolated attacks by individual bombers to large scale attacks against state targets by organized networks to state sponsored genocide and politicide thus facilitating comparisons across multiple cases As well the book s model of conflict is informed by game theory enriched with understandings of psychological cultural and historical contexts helping students focus on the strategies and desired outcomes of different parties to conflict This analytic approach enables students to trace the changes in mutual perceptions and preferences between terrorists and their targets and leads to a fuller understanding of the causes and dynamics of political violence The book s uniquely comprehensive coverage of terrorism includes extended cases on the IRA the Tamil Tigers Chechen rebels Al Qaeda Aum Shinrikyo Hizbullah and Hamas Each case looks at the historical origins political factors leadership and organization of the group to give context Discussions of typical tactics patterns of violence the role of

external actors and outcomes help readers to explore possible solutions that might stop the cycle of violence and promote peaceful coexistence among the antagonists Appendix materials include glossaries of terrorist groups and technical terms
