Wallace,Charles Darwin,2004 *Palaeontology* Richard Owen,2003 *Palaeontology* Richard Owen,2003 Owen was the founder of the Natural History Museum bringing the collections over from the British Museum This volume examines fossil evidence for change in species over time *Alfred Russell Wallace Contributions to the theory of Natural Selection, 1870, and Charles Darwin and Alfred Wallace , 'On the Tendency of Species to form Varieties' (Papers presented to the Linnean Society 30th June 1858)* David Knight,2004-03-01 Wallace noticed on expeditions to the Amazon and the Malay archipelago that mammals in Southeast Asia are more advanced than their Australian cousins His suggestion was that the two continents had split before the better adapted mammals had evolved in Asia The isolated Australian marsupials were able to thrive whilst those in Asia were driven to extinction by competition from more advanced mammals This led to his theory of natural selection which he presented to the Linnean Society in 1858 with Charles Darwin This volume reprints those papers presented to the Linnean Society *The Evolution Debate, 1813-1870: Omphalos* Philip Henry Gosse,2003 Gosse argued that fossils are not really the remains of creatures which existed Gosse s work was popular with neither Christians nor evolutionists **The Evolution Debate 1813-1870** Charles Darwin,2004-06-01 *On the Origin of Species* caused an uproar when it was first published in 1859 Darwin s theory was that species had evolved from simpler organisms by natural selection acting upon the variability of populations This view was directly opposed to the doctrine of special creation by God and angered the Church and Victorian public opinion This volume is a facsimile of one of the original copies sent to the eminent geologist Leonard Horner The volume also includes sample pages from Darwin s original handwritten manuscript the exclusive property of the Natural History Museum **The Evolution Debate, 1813-1870: Geology and Mineralogy, Considered with Reference to Natural Theology, volume II** William Buckland,2003 **Omphalos, 1857** Philip Gosse,2004-06-01 Gosse argued that fossils are not really the remains of creatures which existed God had created the world in six days but had made it look like it was already ancient complete with the remains of non existent pre historic life Gosse s work was popular with neither Christians nor evolutionists *The Evolution Debate, 1813-1870: Geology and Mineralogy, Considered with Reference to Natural Theology, volume II* David Knight,2003 **Geological Evidence of the Antiquity of Man, 1863** Charles Lyell,2003 Charles Lyell s argument in this classic volume is that the processes of nature are slow and uniform and that the Earth is in consequence hundreds of millions of years old This work includes his prediction that if our nearest relatives are great apes then the places to look for human fossils will be central Africa and Indonesia Man's Place in Nature, 1863 Thomas Henry Huxley,2003 Huxley was one of the first adherents to Darwin s theory of evolution by natural selection and advanced its acceptance by scientists and the public *Man s Place in Nature* was explicitly directed against

Richard Owen who had claimed that there were distinct differences between human brains and those of apes Huxley demonstrated that ape and human brains were fundamentally similar in every anatomical detail thus applying evolution to the human race Geology & Mineralogy, Considered with Reference to Natural Theology, Volume I, 1836 William Buckland, 2004-03-01 Moving away from his earlier belief in a short catastrophic history of the Earth this volume shows how Buckland envisages instead progressive change as the Earth gradually cooled as it was prepared for human occupation Extinct creatures did not die out because they were poorly designed God loved the dinosaurs and had adapted them to their various circumstances **Geology & Mineralogy, Considered with Reference to Natural Theology, Volume II, 1836** William Buckland, 2018-10-24 Moving away from his earlier belief in a short catastrophic history of the Earth this volume shows how Buckland envisages instead progressive change as the Earth gradually cooled as it was prepared for human occupation Extinct creatures did not die out because they were poorly designed God loved the dinosaurs and had adapted them to their various circumstances *Palaeontology* Richard Owen, 1858 **The Evolution Debate, 1813-1870** , 2003 **Guide to Reprints** , 2009 The Evolution Debate, 1813-1870 , 2003
