Pain Patients Traits And Treatments:

Psychological Approaches to Pain Management Dennis C. Turk, Robert J. Gatchel, 2018-05-07 This authoritative handbook now significantly revised with more than 50% new material introduces practitioners and students to the state of the art in psychological interventions for managing pain. Leading experts review the most effective treatment approaches for enhancing patients' coping and self-efficacy and reducing pain-related disability, including cognitive behavioral therapy, biofeedback, clinical hypnosis, group therapy, and more. Strategies for integrating psychosocial and medical treatments for specific populations are described, with chapters on back pain, headache, cancer, and other prevalent chronic pain disorders. Attention is given to customizing intervention for individual patients, maximizing treatment adherence, and preventing overuse of opioids and other medications. New to This Edition: Chapter on resilience focusing on mindfulness and acceptance-based approaches; Chapters on managing pain with comorbid psychological disorders, posttraumatic stress disorder, and substance use disorder; Chapter on emerging uses of technology. Even more practitioner friendly, every chapter concludes with bulleted Clinical Highlights. Many new authors extensively revised with over 15 years of research and clinical advances.

Life Care Planning and Case Management Handbook Roger O. Weed, Debra E. Berens, 2018-09-03 Life care planning is an advanced collaborative case management specialty practice focused on assessing, evaluating, coordinating, consulting, planning for, and monitoring necessary services for individuals with complex medical care needs over their lifetime. This handbook provides a comprehensive resource for all people involved with catastrophic impairments and chronic medical care case management. The Life Care Planning and Case Management Handbook, Fourth Edition begins by defining the roles played by each of the key team members working with the life care planner. It provides planners with insights critical to successful interactions with medical and health care related professionals as well as the team members they are most likely to encounter as they work to build an accurate and reliable life care plan. Next, the text offers up-to-date information on the medical conditions most frequently encountered by the life care planner. The contributors, who are recognized experts in their disciplines, also address issues in forensic settings, ethics, standards research, and credentials. The fourth edition includes numerous chapters on general issues as well as updated standards of practice from the International Academy of Life Care Planners (IALCP). Life Care Planning Consensus Statements and valuable step-by-step charts and checklists. Completely updated and expanded, this revised handbook now includes new chapters on multicultural considerations in life care planning, admissibility of life care plans in U.S. courts, and Canadian life care planning practice. Additionally, infused in other chapters is new information on medical coding and costing for life care planners, life care planning in non-litigated contexts as well as research and education within life care planning.
