## **Pain The Science Of Suffering:**

Pain Patrick Wall,2002-05-07 Pain is one of medicine's greatest mysteries. When farmer John Mitson caught his hand in a baler he cut off his trapped hand and carried it to a neighbor. sheer survival and logic was how he described it. And strangely I didn't feel any pain. How can this be? We're taught that pain is a warning message to be heeded at all costs yet it can switch off in the most agonizing circumstances or switch on for no apparent reason. Many scientists, philosophers, and laypeople imagine pain to operate like a rigid, simple signaling system as if a particular injury generates a fixed amount of pain that simply gets transmitted to the brain yet this mechanistic model is woefully lacking in the face of the surprising facts about what people and animals do and experience when their bodies are damaged. Patrick Wall looks at these questions and sets his scientific account in a broad context interweaving it with a wealth of fascinating and sometimes disturbing historical detail such as famous characters who derived pleasure from pain the unexpected reactions of injured people the role of endorphins and the power of placebo. He covers cures of pain ranging from drugs and surgery through relaxation techniques and exercise to acupuncture, electrical nerve stimulation and herbalism. Pain involves our state of mind our social mores and beliefs and our personal experiences and expectations. Stepping beyond the famous neurologic gate control theory for which he is known Wall shows that pain is a matter of behavior and its manifestation differs among individuals, situations, and cultures. The way we deal with pain is an expression of individuality. Pain Patrick David Wall,1999 Pain and Suffering Ronald Schleifer,2014-01-10 Pain is felt by everyone yet understanding its nature is fragmented across myriad modes of thought. In this compact yet thoroughly integrative account uniting medical science, psychology, and the humanities Ronald Schleifer offers a deep and complex understanding along with possible strategies of dealing with pain in its most overwhelming forms. A perfect addition to many courses in medicine, healthcare, counseling, psychology, and social work.
