Painpassion Power:

Pain, Passion and Faith Joanna Cruickshank, 2009 *Pain Passion and Faith Revisiting the Place of Charles Wesley in Early Methodism* is a significant study of the 18th century poet and preacher Charles Wesley. Wesley was an influential figure in 18th century English culture and society; he was co-founder of the Methodist revival movement and one of the most prolific hymn writers in the English language. His hymns depict the Christian life as characterized by a range of intense emotions from ecstatic joy to profound suffering. With this book, author Joanna Cruickshank examines the theme of suffering in Charles Wesley's hymns to help us understand how early Methodist men and women made sense of the physical, emotional, and spiritual pains they experienced. Cruickshank uncovers an area of significant disagreement within the Methodist leadership and illuminates Methodist culture more broadly, shedding light on early Methodist responses to contemporary social issues like charity, slavery, and capital punishment.

Feminism and Christianity Lynn Japinga, 1999 *Some have raised the question: Is it possible at the same time to be a Christian and a feminist?* Japinga asks the question a bit differently: *Is it possible not to be?* Like the other titles in the Essential Guides series, the purpose of this book is simple: to introduce college and seminary students to the basic questions and issues that arise from a feminist interpretation of Christianity. The author explores the central ideas of Christian feminism, including its critique of patriarchy in Christianity and its recovery of the presence, actions, and ideas of women. What has been troublesome in Christianity for feminists and why? How have Christian feminists dealt with these issues? What resources are there in Christianity for the empowering and encouragement of women? Beginning with an examination of women and the Bible, the book explores biblical texts which define women negatively as well as those which emphasize women's strengths and ability, and then outlines the various feminist approaches to the interpretation of Scripture. It then moves to an overview of women in the history of Christianity and specifically of religion in America, presenting both prevailing attitudes about women and the usually unheard stories of women. After surveying the main questions a feminist method brings to the study of theology, Japinga then explores certain theological questions: How do we speak of God? Who is Christ? What does it mean to be human? Written from a moderate feminist perspective, this book provides a broad overview of feminist approaches to theological disciplines. It emphasizes consensual scholarship rather than points of controversy. It acquaints students with feminist analysis by way of the central themes common to feminist approaches to several disciplines and introduces readers to this material in ways that lessen the possibility that they will be threatened, intimidated, or angered by it. While the book offers professors an affordable and accessible textbook choice, it is also accessible for lay study groups in congregations.

[The Goals of Medicine](#) Mark J. Hanson, Daniel Callahan, 1999 Debates over health care have focused for so long on economics that the proper goals for medicine seem to be

taken for granted yet problems in health care stem as much from a lack of agreement about the goals and priorities of medicine as from the way systems function. This book asks basic questions about the purposes and ends of medicine and shows that the answers have practical implications for future health care delivery, medical research and the education of medical students. The Hastings Center coordinated teams of physicians, nurses, public health experts, philosophers, theologians, politicians, health care administrators, social workers and lawyers in fourteen countries to explore these issues. In this volume they articulate four basic goals of medicine: prevention of disease, relief of suffering, care of the ill and avoidance of premature death, and examine them in light of the cultural, political and economic pressures under which medicine functions. In reporting these findings the contributors touch on a wide range of diverse issues such as genetic technology, Chinese medicine, care of the elderly and prevention and public health. *The Goals Of Medicine* clearly demonstrates the importance of clarifying the purposes of medicine before attempting to change the economic and organizational systems. It warns that without such examination any reform efforts may be fruitless.
