**Painting for Children** Lois Thomasson Horne,1968 [Children's Emotions in Europe, 1500 – 1900](#) Jeroen J. H. Dekker,2024-04-04 This book gives you the historical sensation of coming face to face with the bodily expression and regulation of children s emotions over time The study does this by encouraging you to look through the eyes of well known artists like Albrecht D rer Domenico Ghirlandaio Jan Steen Antony van Dyck Rembrandt and Titian in early modern Europe and Jean Baptiste Sim on Chardin Thomas Lawrence Jean Honor Fragonard Philipp Otto Runge Willem Bartel van der Kooi Paul Gauguin Auguste Renoir and Jozef Isra ls in the late 18th and 19th centuries These sources are supplemented by works from less famous artists as well as popular emblem books child advice manuals observations from the emerging child sciences and personal documents Jeroen Dekker observes children s emotions mainly in the child s world and in the domestic emotional space and connects them with history s ongoing underlying discourse on education and the emotions This discourse was developed by theologians philosophers and moralists like Augustine Aquinas Erasmus Descartes Jacob Cats John Locke and Jean Jacques Rousseau by Romantic educationalists like Friedrich Fr bel and Ellen Key and by scientists like

Charles Darwin and William James who emphasized the biological instead of the moral fundament of children's emotions. The story of children's emotions is told in the context of cultural movements like the Renaissance Humanism the Reformation the Enlightenment Romanticism and the starting Age of Child Science. Children's Emotions in Europe 1500-1900 crucially highlights the continuous co-existence of regulation oriented and child oriented educational views on children's emotions.

**Painting Children** Benedict Rubbra, 1993    **Children's Lively Minds** Deb Curtis, Nadia Jaboneta, 2019-08-13 Teachers often see repetitive behaviors in toddler and preschool classrooms such as building and knocking down block towers or dumping out toys. When children do these actions over and over, it can be irritating to teachers and parents, but viewing these actions through the lens of schema theory developed by Jean Piaget can help understand what's really going on in children's brains when they display these repetitive behaviors. Children's Lively Minds is filled with stories about real children exploring

schema followed by reflection and questions about what children might be learning Schema theory in your work with young children whether you know it or not Understanding it putting intention behind it can help families and teachers ease frustration with young children s repetitive behavior and allow adults to better support brain development
