## **Palaeolithic Cave Art:**

*What Is Paleolithic Art?* Jean Clottes, 2016-04-25 The noted archaeologist explores the varieties of prehistoric cave art across the world and offers surprising insights into its purpose and meaning. What drew our Stone Age ancestors into caves to paint in charcoal and red hematite to watch the likenesses of lions, bison, horses, and aurochs as they flickered by firelight? Was it a creative impulse, a spiritual dawn, a shamanistic conception of the world? In this book, Jean Clottes, one of the most renowned figures in the study of cave paintings, pursues an answer to the why of Paleolithic art. Discussing sites and surveys across the world, Clottes offers personal reflections on how we have viewed these paintings in the past, what we learn from looking at them across geographies, and what these paintings may have meant and what function they may have served for their artists. Steeped in Clottes's shamanistic theories of cave painting, *What Is Paleolithic Art?* travels from well-known Ice Age sites like Chauvet, Altamira, and Lascaux to visits with contemporary aboriginal artists, evoking a continuum between the cave paintings of our prehistoric past and the living rock art of today. Clottes's work lifts us from the darkness of our Paleolithic origins to reveal surprising insights into how we think, why we create, why we believe, and who we are.

*Palaeolithic Cave Art at Creswell Crags in European Context* Sergio Ripoll, 2007-03-29 This comprehensively illustrated book presents the Creswell art itself, the archaeology of the caves and the region, and the context of the Upper Palaeolithic era in Britain as well as a number of studies of Palaeolithic cave art in Spain, Portugal, France, and Italy. **Interpretation of prehistoric cave art in Europe** Difrine Madara, 2019-11-12 Essay from the year 2019 in the subject Archaeology, grade A, Kenyatta University, language English, abstract. This essay offers a critical analysis of various explanations that have been suggested for the meaning of European Paleolithic rock art. Rock or cave art has been recorded in Europe, Americas, Africa, Australia, and Asia. In Europe, some of the recorded forms of rock art date back some 36000 years ago. However, archaeological findings show that it is until 18000 years ago that the European rock art flourished. This period is linked to the end of the Last Glacial Maximum, 22000-19000 years ago, as climatic conditions began to improve, i.e., the most critical point of the Ice Age. Nonetheless, Upper Paleolithic rock art disappeared during the transition period between Paleolithic and Mesolithic, 12000 years ago. Ice Age environmental conditions faded. After over a century of research on cave art, there still exists no consensus on the meanings of these prehistoric arts. Currently, the widely accepted view on interpretation of the Upper Paleolithic art is that most cave images are manifestations of Shamanic rituals mediated through visionary experience of altered states of consciousness. However, the question on how and why art came into being in Upper Paleolithic during the Ice Age remains largely unanswered. Berghaus argued that there is no single answer to the question, but rather several layers of answers highlighting the issues and relationships between art and rituals, as well as behavioral, social, and cognitive issues within the human evolutionary environment. **Interpreting Sapiens' Consciousness through Paleolithic Cave Art** Gary J. Maier, 2023-08-08 This book is the first to identify an interpretive path through Paleolithic cave art that can provide

plausible meaning to the animal figures in the Lascaux cave in France The artwork was created during a period described as the Creative Explosion spanning from 35 000 to 11 000 BC The author has found that the artists or shamans have left clear evidence of aspects of their worldview and by using ethological evidence such as a bison shedding its winter coat to identify spring as the season portrayed in a specific panel he adds a level of certainty to his interpretations In sum this book argues that the cave art describes the journey of the soul from the spirit world to the natural world and back and that it identifies a spectrum of consciousness involving the five traditional senses sight smell touch taste and hearing Moreover the book explores the hunting strategies employed early survival groups which are depicted in the cave art The role of the shamans impact on the artwork is also addressed [Cave Art](#) Jean Clottes,2008-07-16 A comprehensive accessible guide to prehistoric art in Europe and beyond

CANTABRICA PALAEOLITHIC ARTS IN NORTHERN SPAIN with a DVD ROM of the image database This book is published based on these book and database in POD Publishing On Demand format For this publishing the images of cave paintings and mobile arts are scheduled to be published as the catalog editions in POD so that readers are able to see those images without PC And on June 15 2012 an extremely interesting report on the cave paintings of Northern Spain was published in Science

The report was written by Prof Alistair Pike of University of Bristol UK and his colleagues and it was reported that Uranium series disequilibrium dating was executed that year for calcite deposits overlying art found in 11 caves in Northern Spain and the results demonstrated that some paintings of El Castillo extended back at least to the Early Aurignacian period with

minimum ages of 40 8 thousand years for a red disk 37 3 thousand years for a negative hand It was surprising because if this dating is correct the red disk becomes about 4 000 years earlier than the paintings of Grotte Chauvet that has been said to be the world s oldest and not only that it can not be ruled out that the earliest paintings were created by Neanderthals which

were estimated to present in the Cantabrian regions until at least 42 000 to 36 000 years B P This is our main reason why we decided to publish this book in POD Contents 1 The Art of Upper Paleolithic hunters Introduction to cave art in the Iberian Peninsula 2 Everyday art Upper Paleolithic decorated objects in the Cantabrian Region 3 The western Cantabrian Region

French and Spanish Upper Paleolithic cave art was drawn forty thousand to eleven thousand years ago and it was motivated  
by climate change Kieran D O Hara a geologist and professor emeritus at the University of Kentucky explains why we know  
that to be true in this groundbreaking book His goal isn t to explore the meaning of cave art but to show why it was done  
While many scholars argue that the art depicted in these caves don t depict the animals of that period O Hara argues just the  
opposite putting forth the controversial theory that the cave paintings accurately reflect the climate and animals that existed  
alongside the artists For far too long cave art specialists have incorrectly concluded that cave art doesn t match up with the  
reality of life at the time because they ve been comparing archaeological bone remains with cave imagery of a different age
