Beyond a Shadow of a Diet
 Judith Matz, Ellen Frankel, 2024-05-20 Now in its third edition *Beyond a Shadow of a Diet* is the most comprehensive book available for professionals working with clients who struggle with binge and emotional eating chronic dieting and body image. Divided into three sections: The Problem, The Treatment, and The Solution, this book is filled with compelling clinical examples, visualizations, and exercises that professionals can use to deepen their knowledge and skills as they help clients find freedom from preoccupation with food and weight. New research on diet failure, health weight, and weight stigma makes a case for why clinicians must reflect on their own attitudes and biases to understand how a weight loss focus can harm clients. In addition to addressing the symptoms, dynamics, and treatment of eating problems, this book presents a holistic framework that includes topics such as cultural, ethical, and social justice issues, the role of self-compassion, and promoting physical and emotional well-being for people of all shapes and sizes. Drawing from the attuned eating and weight-inclusive frameworks, this book serves as an essential resource for both new clinicians and those interested in shifting their clinical approach. Trauma-informed and filled with compelling client stories and step-by-step strategies, *Beyond a Shadow of a Diet* offers professionals and their clients a positive, evidence-based model for making peace with food, their bodies, and themselves.

Clinical Nursing Practices
 Sarah Renton, Claire McGuinness, Evelyn Strachan, 2019-10-08 The new edition of *Clinical Nursing Practices* reflects the many changes in nurse education and practice. A team of clinical and education experts has updated the core practices contained within this text while, to ensure continuity, the previous editors have acted as consultants in the development of this edition. To reflect the continuing evolution of nursing and nursing practice, this new 6th edition emphasizes the importance of evidence-based practice, values-based care, person-centred care, health and social care integration, and interprofessional education. To encourage reflective practice, self-assessment questions remain at the end of each chapter for some of the practices. Where appropriate, certain practices are evidenced mainly by National Guidelines and Standards such as Cardio Pulmonary Resuscitation, Infection Control, and Blood Transfusion; consequently, the presentation of the skill or procedure reflects this. The updated text addresses the wider issues which impact on everyday nursing and healthcare practice and is specially written to meet the needs of nurses today. The core philosophy of the book, however, remains the same: to encourage its readers to deliver the highest quality care to each individual patient safely and effectively. Simple and straightforward step-by-step accounts of the key clinical procedures with clear learning outcomes. For nurses learning procedures for the first time, for newly qualified nurses needing to check their knowledge, or for nurses returning to work needing an update or refresher. Equips readers to deliver high quality, safe and effective care to patients. References the new NMC standards of proficiency. Updates to all chapters and skills. New Action Rationale format clearly shows the reasons for performing each procedure. 25 new illustrations. New editor team.
