Maria Mitchell and the Sexing of Science Renée L. Bergland, 2008 New England blossomed in the nineteenth century, producing a crop of distinctively American writers along with distinguished philosophers and jurists, abolitionists and scholars. A few of the female stars of this era—Emily Dickinson, Margaret Fuller, and Susan B. Anthony, for instance—are still appreciated, but there are a number of intellectual women whose crucial roles in the philosophical, social, and scientific debates that roiled the era have not been fully examined. Among them is the astronomer Maria Mitchell. She was raised in isolated but cosmopolitan Nantucket, a place brimming with enthusiasm for intellectual culture and hosting the luminaries of the day from Ralph Waldo Emerson to Sojourner Truth. Like many island girls, she was encouraged to study the stars. Given the relative dearth of women scientists today, most of us assume that

science has always been a masculine domain But as Renee Bergland reminds us science and humanities were not seen as separate spheres in the nineteenth century indeed before the Civil War women flourished in science and mathematics disciplines that were considered less politically threatening and less profitable than the humanities Mitchell apprenticed with her father an amateur astronomer taught herself the higher math of the day and for years regularly swept the clear Nantucket night sky with the telescope in her rooftop observatory In 1847 thanks to these diligent sweeps Mitchell discovered a comet and was catapulted to international fame Within a few years she was one of America's first professional astronomers as computer of Venus a sort of human calculator for the U.S. Navy's Nautical Almanac she calculated the planet's changing position After an intellectual tour of Europe that included a winter in Rome with Sophia and Nathaniel Hawthorne Mitchell was invited to join the founding faculty at Vassar College where she spent her later years mentoring the next generation of women astronomers Tragically opportunities for her students dried up over the next few decades as the increasingly male scientific establishment began to close ranks Mitchell protested this cultural shift in vain The woman who has peculiar gifts has a definite line marked out for her she wrote and the call from God to do his work in the field of scientific investigation may be as imperative as that which calls the missionary into the moral field or the mother into the family The question whether women have the capacity for original investigation in science is simply idle until equal opportunity is given them In this compulsively readable biography Renee Bergland chronicles the ideological academic and economic changes that led to the original sexing of science now so familiar that most of us have never known it any other way The best thing in its line since Dava Sobel's *Longitude* Maria Mitchell and the Sexing of Science tells a great if too little known story of an intellectual woman in 19th century New England And it is beautifully told I simply could not put it down Anyone who cares about women's education in America should read this compelling and indispensable book Robert D Richardson author of Henry Thoreau *A Life of the Mind* Emerson *The Mind on Fire* and William James *In the Maelstrom of American Modernism* Renee Bergland recounts the story of Maria Mitchell's life and work in glorious and careful detail One feels and hears the sounds of Mitchell's native Nantucket her adopted Vassar and comes to understand how one of the gentler sex advanced astronomy in her day Londa Schiebinger author of *Has Feminism Changed Science?* **Maria Mitchell** Maria Mitchell, 1991-10 Bonded Leather binding **Among the Stars** Margaret Moore Booker, 2007 **MARIA**

as she toured academies to deliver her scientific lectures Born in Massachusetts in 1818 Maria demonstrated an affinity for astronomy and science from a young age At the time it was almost impossible for a woman to gain a formal education in science as a young housewife and later as a schoolteacher Maria read many books and thereby educated herself The most practical application of astronomy in Maria s time was in navigation and shipping the use of the heavens to steer oceangoing ships on the right course was crucial Before becoming a scientist in her own right Maria had already become familiar with naval equipment astronomical concepts and use of the telescope Her discovery of a comet in 1847 caused a great stir yet respect and awards for her accomplishment swiftly followed Maria Mitchell became something of a sensation and would spend the following decades authoring and publishing papers and delivering lectures to academic audiences In maturity having amply demonstrated her abilities as an astronomer she was granted a professorship at Vassar College [Something on My Mind](#) Maria Mitchell,2007-10 From the author of The Cemetery Fence comes another heart pumping mind wrenching sequence of non stop mystery and suspense Open to page one and join this journey of uncertainty Be taken back in time to learn of the characters past and then whisked into the present to witness freakish events taking place in different areas of the country Find out who are friends who are evil and who are just plain Sheep Quotes from Proofreaders This story has more twists than a Chubby Checker concert I always knew he was artistically deranged now I have paperback proof Don t read it I decided to skim through a couple of chapters before bed I found myself anxious to find out the ending in the morning hours I couldn t put it down I almost missed work the next day When this guy makes it to the big time he better hire me

Astronomer Stephanie Sammartino McPherson, 2011-08-01 It was a clear autumn night in 1847 Maria Mitchell stood on the roof of her parents house on the island of Nantucket focusing her telescope on a faraway star. Suddenly she realized that the faint blurry light wasn't a star at all it was a comet. Maria Mitchell's discovery changed her life. She became famous as the first acknowledged woman astronomer in the United States. During her many travels Maria came to realize that most women did not have the same opportunities as men. She thought that women should be encouraged to be anything they wanted to be. This was a lesson she taught her students as an astronomy professor at Vassar College and a message she stressed as the president of the Association for the Advancement of Women. From the rooftops of Nantucket to the great observatories of Europe Stephanie Sammartino McPherson skillfully chronicles the life of this outstanding woman

Maria Mitchell Henry Albers, 2001 America's first woman astronomer was born in 1818 on Nantucket Island Massachusetts. Patiently observing the skies with her father as early as age twelve Maria eventually discovers a telescopic comet. For this 1847 feat she is awarded a Gold Medal by the King of Denmark. Other honors and world fame follow. When Vassar College opens in 1865 Maria is there as its first Professor of Astronomy. She remains to serve under three Vassar presidents. A passionate seeker of truth and wisdom Maria Mitchell's keen views are revealed in her journals. Her growth as an advocate for women's rights is dramatically portrayed. At eighteen she is hired as the first librarian for the Nantucket Atheneum where she educates herself studying the books she orders. Twenty years later we see her now internationally renowned a welcome guest in salons of the world's leading scientists and literary figures. Maria's tales of daring travel by bumpy stagecoach Russian droskys Mississippi River boats and Atlantic side wheelers are here as are her perceptive accounts of the celebrities of her day. Journeying westward alone escorting a Chicago debutante on her Grand Tour taking a teenage nephew to Russia complete with daunting sometimes comical adventures all come to life. She organizes Vassar students to observe meteors and undertake eclipse expeditions. In her journals we see Maria Mitchell grow under the tutelage of her father in a warm and active family

Her Eyes on the Stars Laurie Wallmark, 2023-05-02 Maria Mitchell's curiosity about the night sky led her to spend hours studying the stars. She discovered a comet as a young woman winning an award from the King of Denmark for being the first person to discover a new comet using a telescope. Now famous as the lady astronomer Maria went on to become a professional
