**The Discovery of Radium and Radio Active Substances by Marie Curie (Illustrated)** Marie Curie, 2021-07-28 IN HER recent visit to America, Madame Curie conferred a special honor upon Vassar College by delivering in the chapel on the evening of May fourteenth the only extended address which she made in this country. In a simple straightforward way she told the story of her great achievement. One realized how closely environed by all the great realities of human experience in the face of tremendous difficulties and with limited resources she had pursued undaunted her search for truth. The discovery of radium gave Madame Curie immediate distinction among scientists on account of the extremely significant contribution she thereby made to the great ultimate problem of physical science, the constitution of matter. The striking properties possessed by radium gave to its discovery a world wide interest all the more intense because of the hope which was inspired by the possible healing qualities of the radiations from this new element. That hope is being realized in large measure. It is therefore fitting that this address should have been given by Madame Curie at Vassar and that it should now be circulated among the members of the college under the foundation in memory of Ellen S. Richards who devoted her life to the public health.
