Marine Minerals United States. National Advisory Committee on Oceans and Atmosphere, 1983 **Marine Minerals**, 1987 *Marine Minerals* United States. Congress. Office of Technology Assessment, 1987 *Marine Minerals in Exclusive Economic Zones* D.S. Cronan, 1991-11-30 In the last ten years offshore mineral exploration programmes have increasingly concentrated on the 200 mile Exclusive Economic Zones adjacent to coastal states This book gives an integrated treatment of the various mineral types occurring in these zones their genesis distribution and economic importance The book opens with a broad overview of the subject and discusses the legislative issues relevant to marine and mineral exploitation Chapters then deal in turn with aggregates placers precious coral phosphorites manganese nodules cobalt rich manganese crusts and hydrothermal deposits An international set of case studies illustrates each type of deposit many studies based on the author's own experience in marine mineral evaluation programmes around the world during the past 25 years **Proceedings of the Marine Minerals Workshop, March 23-25, 1976, Silver Spring, Md**, 1976 **Handbook of Marine Mineral Deposits** David Spencer Cronan, 1999-11-24 This handbook summarizes the main advances in our understanding of marine minerals and concentrates on the deposits of proven economic potential In cases where our knowledge may be too limited to allow defining of their economic potential those minerals are covered regionally or by deposit type Handbook of Marine Mineral Deposits is divided into three sections Marine placers manganese nodules and crusts and deep sea hydrothermal mineralization All of these mineral deposits have great potential importance to economic geologists and marine mines Edited by an acknowledged expert in the field this handbook includes work by internationally renowned contributors The new United Nations Law of the Sea ratified by over 100 countries within the past two years provides a framework and guidelines for deep sea mineral exploration that increases international interest in this book The Handbook serves as a platform from which to launch the more detailed evaluation studies that will need to take place in the 21st century before recovery can continue or commence Handbook of Marine Mineral Deposits is useful to mineralogists economic geologists marine geologists marine miners and conservationists Features Marine Mineral Exploration H. Kunzendorf, 1986-05-01 The past 20 years have seen extensive marine exploration work by the major industrialized countries Studies have in part been concentrated on Pacific manganese nodule occurrences and on massive sulfides on mid oceanic ridges An international jurisdictional framework of the sea bed mineral resources was negotiated by the United Nations Conference on the Law of the Sea UNCLOS III A most important outcome of this conference was the establishment of an Exclusive Economic Zone EEZ of at least 200 nautical miles for all coastal states and the recognition of a deep sea regime Mineral deposits in EEZ areas are fairly unknown many areas need detailed mapping and mineral exploration and the majority of coastal or island states with large EEZ areas have little experience in exploration for marine hard minerals This book describes the systematic steps in marine mineral exploration Such exploration requires knowledge of mineral deposits and models of their formation of

geophysical and geochemical exploration methods and of data evaluation and interpretation methods These topics are described in detail by an international group of authors A short description is also given of marine research vessels evaluation of marine exploration examples and an overview is provided of the jurisdictional situation after UNCLOS III

Marine Minerals Roger G. Burns, 2018-12-17 Volume 6 of Reviews in Mineralogy was originated from notes prepared for a short course on Marine Minerals held in La Jolla California November 2 3 1979 Chapters in this volume are devoted to marine manganese oxide iron oxide silica polymorphs zeolite clay phosphorite barite evaporite and placer minerals Carbonates are not included coverage of this important mineral group warrants a separate monograph The extremely interesting sulfide and hydrothermal mineral assemblages recently discovered at oceanic spreading centers are also not discussed here Marine Minerals was first published in 1979 as Volume 6 of the series entitled Short course In 1980 the Mineralogical Society of America changed the name of the series to Reviews in Mineralogy and for that reason this the second printing of Marine Minerals has been reissued under the new banner Only minor corrections have been made

Marine Minerals P.G. Teleki, M.R. Dobson, J.R. Moore, U. von Stackelberg, 2012-12-06 Discoveries of new types of marine mineral occurrences during the last decade and specifically the massive sulfide deposits at spreading ridges on the ocean floor have significantly advanced geologic concepts about the origin of ore deposits in a very short period of time These discoveries also renewed interest in all marine mineral occurrences including the well known manganese nodules and led to more wide ranging and thorough examination of cobalt rich manganese crusts expanded mapping of phosphorites of continental shelves and the initiation of several new surveys for placer minerals in shallow waters The result of these activities is already noticeable in an increasingly broader variety of minerals being found on and below the ocean floor This upsurge of scientific interest and research in marine minerals provided the impetus to organize an Advanced Research Workshop under auspices of the NATO Science Council and its Special Program Panel on Marine Sciences The workshop was held in the United Kingdom at Gregynog Hall of the University of Wales June 10 16 1985 under the theme Marine Minerals Resource Assessment Strategies The timing of this workshop was propitious in many ways First marine surveys and expeditions to chart the mineral resources of the world's oceans had increased in number in recent years involving a growing number of nations interested in obtaining firsthand information
