Mark Kaplan:

Austin's Way with Skepticism Mark Kaplan, In Austin's Way with Skepticism Mark Kaplan argues that J L Austin's ordinary language approach to epistemological problems has been misread. Contrary to the consensus view Kaplan presents Austin's methods as both a powerful critique of the project of constructive epistemology and an appreciation of how epistemology needs to be done. **The Trade-mark Reporter**, 1922 *California. Records and Briefs* California (State)., *Supreme Court of the State of New York Appellate Division First Department*, *Supreme Court of the State of New York*, 1910 **Framing Theory's Empire** John Holbo, 2007-11-16 As the Theory Era draws to a close we need more than ever intelligent rumination and debate over what it all meant. THEORY'S EMPIRE was an important step in that direction. Framing THEORY'S EMPIRE carries on the conversation with sophistication and flair. Denis Dutton *Skadden* Lincoln Caplan, 1994-10-30 In this unprecedented look at the culture of American lawyering Lincoln Caplan shows us Skadden's origins in the white shoe postwar legal world and its rise to preeminence in the era of Drexel Burnham Lambert, the firm's largest client in the eighties. Skadden is revealed as a place that prizes opportunists but which also created a 10 million program to support public interest lawyers. In Caplan's probing and even handed account the story of Joe Flom's firm illuminates an era in America business and society. Caplan's inside insights are fascinating. It is as if we get not only one of L A Law's best episodes but also a lot of what is usually left on the cutting room floor. Booklist *Columbia Alumni News*, 1925 **The Book of Evidence** Peter Achinstein, 2001-09-20 What is required for something to be evidence for a hypothesis. In this fascinating elegantly written work distinguished philosopher of science Peter Achinstein explores this question rejecting typical philosophical and statistical theories of evidence. He claims these theories are much too weak to give scientists what they want: a good reason to believe and in some cases they furnish concepts that mistakenly make all evidential claims a priori. Achinstein introduces four concepts of evidence, defines three of them by reference to potential evidence and characterizes the latter using a novel epistemic interpretation of probability. The resulting theory is then applied to philosophical and historical issues. Solutions are provided to the grue/ravens lottery and old evidence paradoxes and to a series of questions. These include whether explanations or predictions furnish more evidential weight, whether individual hypotheses or entire theoretical systems can receive evidential support, what counts as a scientific discovery and what sort of evidence is required for it. The historical questions include whether Jean Perrin had non-circular evidence for the existence of molecules, what type of evidence J J Thomson offered for the existence of the electron and whether as is usually supposed he really discovered the electron. Achinstein proposes answers in terms of the concepts of evidence introduced. As the premier book in the fabulous new series Oxford Studies in Philosophy of Science, this volume is essential for philosophers of science and historians of science as well as for statisticians, scientists with philosophical interests and anyone curious about scientific reasoning. **Federal Register**, 1995-05-16 *IN RE KENT COUNTY CRIMINAL DEFENSE BAR V CHIEF*
