The Markets for Force Molly Dunigan, Ulrich Petersohn, 2015-03-19 *The Markets for Force* examines and compares the markets for private military and security contractors in twelve states Argentina Guatemala Peru Ecuador the United Kingdom the Czech Republic Ukraine Russia Afghanistan China Canada and the United States Editors Molly Dunigan and Ulrich Petersohn argue that the global market for force is actually a conglomeration of many types of markets that vary according to local politics and geostrategic context Each case study investigates the particular characteristics of the region's market how each market evolved into its current form and what consequence the privatized market may have for state military force and the provision of public safety The comparative standpoint sheds light on better known markets but also those less frequently studied such as the state owned and managed security companies in China militaries working for private sector extractive industries in Ecuador and Peru and the ways warlord forces overlap with private security companies in Afghanistan An invaluable resource for scholars and policymakers alike *The Markets for Force* offers both an empirical analysis of variations in private military and security companies across the globe and deeper theoretical knowledge of how such markets develop Contributors Olivia Allison Oldich Bure Jennifer Catallo Molly Dunigan Scott Fitzsimmons Maiah Jaskoski Kristina Mani Carlos Ortiz Ulrich Petersohn Jake Sherman Christopher Spearin

The Rise of the Amsterdam Market and Information Exchange Clé Lesger, 2016-12-05 Most scholars agree that during the sixteenth century the centre of European international trade shifted from Antwerp to Amsterdam presaging the economic rise of the Dutch Republic in the following century Traditionally this shift has been accepted as the natural consequence of a dynamic and progressive city such as Amsterdam taking advantage of expanding commercial opportunities at the expense of a more conservative rival hampered by outmoded medieval practices Yet whilst this theory is widely accepted is it accurate In this groundbreaking study Cl Lesger argues that the shift of commercial power from Antwerp to Amsterdam was by no means inevitable and that the highly specialized economy of the Low Countries was more than capable of adapting to the changing needs of international trade It was only when the Dutch Revolt and military campaigns literally divided the Low Countries into separate states that the existing stable spatial economy and port system fell apart and a restructuring was needed Within this process of restructuring the port of Amsterdam acquired a function radically different to the one it had prior to the division of the Netherlands Before the Revolt it had served as the northern outpost in a gateway system centred on Antwerp but with access of that port now denied to the new republic Amsterdam developed as the main centre for Dutch shipping trade and crucially the exchange of information Drawing on a wide variety of neglected archival collections including those of the Bank of Amsterdam this study not only addresses specific historical questions concerning the commercial life of the Low Countries but through the case study of Amsterdam also explores wider issues of early modern European commercial trade and economic development
