**Urban Education** Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d tre of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others

*Educational Administration Abstracts* ,2003      *Fundamental Concepts of Educational Leadership and Management*  
 Taher A. Razik,Austin D. Swanson,2010 In a time of high educational expectations and professional accountability today's educational leaders need to possess a broad variety of skills that enable them to function comfortably and effectively in changing environments and under highly politicized conditions Under these circumstances change is the only constant The mission of this book is to foster understanding of this reality among those preparing for administrative and managerial careers in pre collegiate educational institutions and to help them develop skills necessary for working competently within those institutions This text is eclectic in approach not ideological and emphasizes an action research perspective that compels readers to consider critically the theoretical underpinnings of current educational practice and motivates them to seek practical alternative approaches to solving both common and unique problems This book addresses general principles underlying the knowledge base of leadership and management as specifically applied to educational institutions It stirs learners thoughts through the review of scholarship in a wide range of areas encouraging them to critically consider the theoretical underpinnings of administrative practice      **Curriculum Visions** William E. Doll,Noel Gough,2002 Curriculum Visions challenges the singular guiding vision that has dominated Western educational thought for the past four centuries from Peter Ramus to Ralph Tyler and beyond Influenced by the spirit of John Dewey Curriculum Visions moves beyond his ghost to see what he never saw a playful integration of the scientific the storied and the spiritful In so doing Curriculum Visions asks each of us to develop our own curricular vision based on the logic of reason the personality and culture of society and the awesomeness and mystery of creation      Annual Meeting Program American Educational Research Association,2008      **Current Index to Journals in Education** ,2000      *So Much Reform, So Little Change* Charles M. Payne,2008 This frank and courageous book explores the persistence of failure in today's urban schools At its heart is the argument that most education policy discussions are disconnected from the daily realities of urban schools especially those in poor and beleaguered neighborhoods Charles M Payne argues that we have failed to account fully for the weakness of the social infrastructure and the often dysfunctional organizational environments of urban schools and school systems The result is that liberals and conservatives alike have spent a great deal of time pursuing questions of limited practical value in the effort to improve city schools Payne carefully delineates these stubborn and intertwined sources of failure in urban school reform efforts of the past two decades Yet while his book is unsparing in its exploration of the troubled recent history of urban school reform Payne also describes himself as guardedly optimistic He describes how in the last decade we have developed real insights into the roots of school failure and into how some individual schools manage to improve He also examines recent progress in understanding how particular urban districts have established successful reforms on a larger scale Drawing on a striking array of sources from the recent history of various urban school systems to the growing

sophistication of education research to his own experience as a teacher scholar and participant in reform efforts Payne paints a vivid and unmistakably realistic portrait of urban schools and reforms of the past few decades So Much Reform So Little Change will be required reading for everyone interested in the plight and the future of urban schools
