Blender brought to you by the educators at 3D Tudor who've helped over 250 000 students worldwide master 3D design. Starting Blender can feel daunting but this first part makes it approachable. You'll develop smart habits and clean workflows to keep projects organized. From setting up a readable interface and clean navigation to mastering reliable modeling tools that create shading friendly results, every lesson builds your foundation as a confident 3D artist. Through easy to follow exercises, you'll learn how to install Blender, navigate key menus and viewport modes, and use essential tools like Extrude, Bevel, and Loop Cut. You'll build small assets and understand why seams, sharps, normals, and pivots matter for clean surfaces and predictable shading. Neil adds a touch of British humor that will keep you engaged throughout, even as you unwrap UVs using seams and projections, measure texel density, and explore trim sheets and UDIM basics. With principled PBR materials and Node Wrangler shortcuts, you'll progress from flat clay to believable surfaces. Everything is taught step by step with keystroke callouts and definitions. By the end of this part, your models will look great under lighting, your topology will behave, and your files will be ready for 3D animation, setting you up for Geometry Nodes, rendering, and compositing in Part 2.

Email sign up and proof of purchase required. What you will learn: Customize Blender for speed by clearing workspaces, overlays, the Status Bar, and Outliner filters. Model with precision using Extrude, Inset, Bevel, Loop Cut, Knife, Spin, Slide, Shear, and Rip. Produce shading friendly topology with bridges, fills, smoothing, Auto Smooth, and sharps.
