Making Spaces through Infrastructure Marian Burchardt,Dirk Laak,2023-07-04 Infrastructures are fundamental means through which societies create spaces but little is known about the precise ways in which this occurs How have infrastructures animated certain understandings of space How do infrastructures stabilize or undermine the spatial formats in which we live which shape our everyday practices and which regulate access to services and resources And conversely how do spaces frame the ways infrastructural provision is organized How do existing spaces shape infrastructural development and the scope and forms of access to vital services such as transport and water In this volume historians and sociologists draw on a range of fascinating case studies and provide compelling answers to these questions Exploring among others the provision of irrigation water in nineteenth century Los Angeles the invention of airport transit zones and the infrastructural practices of homeless people in Berlin the book demonstrates how the making of spaces through infrastructure is deeply political Intent on revealing uneven geographies of provision and hierarchies of access the contributors highlight how infrastructures are products of global entanglements **The Software Encyclopedia 2001** ,2001 *Electronic Musician* ,2005 *Periodicals in Print: Australia, New Zealand & the South Pacific* Isa Australia Staff,1997
