**MASTER PLAN**, 1992 Red River Delta Master Plan: Appendices, 1995 GA Document, 2002 Understanding Meaningful Environments: Architectural Precedents and the Question of Identity in Creative Design Ali Guney, 2008-10-15 Understanding Meaningful Environments Architectural Precedents and the Question of Identity in Creative Design intends to put forward a discussion on the use of precedents and the production of innovative designs as well as to discuss the relationship between precedents and identity in a world undergoing a rapid process of globalization This publication provides insights into how the strategy of making use of design precedents as a source of knowledge rather than initiating a project from tabula rasa leads to efficient effective and or innovative results based in particular on the work of Le Corbusier and Santiago Calatrava In the sense that architects ideologies and intentions did not form a main position in this account one may say that it is not a value added approach However in this publication this other side of the use of precedents is explored i e recollection and intention because in addition to innovations the critical use of precedents seems to help in the production of buildings places that embody a critical notion of identity The goal of this study is to provide a reflection on the themes mentioned as well as to briefly discuss methods for precedent analysis

**Annual Report of the Administrator for ...** United Nations Development Programme, 1979      *Making Water Security* Hermen Smit, 2019-12-09 This book examines Nile water security through the morphology of the river it uses the always changing form of the river as a theoretical and empirical device to map and understand how infrastructures and discourses dynamically interact with the Nile By bringing a history of two centuries of dam development on the Nile in relation with the drainage of a hill slope in Ethiopia on the one hand and irrigation reform in Sudan on the other the author shows how the scales, units and populations figuring in projects to securitize the river emerge through the rearrangement of its water and sediments The analysis of Making water security is more than yet another story of how modern projects of water security have legitimized often violent dispossessions of Nile land and water It shows how no water user is confined by the roles assigned by project engineers and planners As ongoing modern development of the river reduces the prospects for new large diversions of water the targeted subjects of development and modernization make use of newly opened spaces to carve out their own projects They creatively mobilize old irrigation and drainage infrastructures in ways that escape the universal logic of water security      Red River Delta Master Plan: River morphology, 1994
