Levy, Alex Sager, Clark Wolf, 2008-09-12 The second volume of this comprehensive anthology covers the twentieth and early twenty first centuries The anthology is broad ranging both in its selection of material by figures traditionally acknowledged as being of central importance and in the material it presents by a range of other figures The material in this volume is presented in three sections The first Power and the State includes selections by such figures as Goldman Lenin Weber Schmitt and Hayek Among those included in the Race Gender and Colonialism section are de Beauvoir Gandhi Fanon and Young The third and by far the longest section Rights Based Liberalism and its Critics focuses on the many interrelated

directions that social and political philosophy has taken since the publication of John Rawls's ground breaking *A Theory of Justice* in 1971. In order to better meet the needs of today's students the editors have made every effort to include accurate and accessible translations of the readings. Additionally every selection has been painstakingly annotated and each figure is given a substantial introduction highlighting her or his major contributions within the tradition. For figures of central importance the editors have included extended introductions that place the figure in the context of intellectual history as well as of political thought. In order to ensure the highest standards of accuracy and accessibility the editors have consulted dozens of leading academics during the course of the volume's development many of whom have contributed introductory material as well as advice. The result is an anthology with unparalleled pedagogical benefits. *The Broadview Anthology of Social and Political Thought* sets the new standard for social and political philosophy instruction.
