Mary Mapes Dodge, 1929 **The Software Encyclopedia 2000** Bowker Editorial Staff, 2000-05 Algebra and the Elementary Classroom Maria L. Blanton, 2008 Algebra in the Elementary Classroom provides the support we need as teachers to embed the development of students algebraic thinking in the teaching of elementary school. Megan Loef Franke Coauthor of Children's Mathematics and Thinking Mathematically How do you start students down the road to mathematical understanding? By laying the foundation for algebra in the elementary grades Algebra and the Elementary Classroom shares ideas, tasks and practices for integrating algebraic thinking into your teaching. Through research based and classroom tested strategies it demonstrates how to use materials you have on hand to prepare students for formal algebra instruction without adding to your overstuffed curriculum. You'll find ways to introduce algebraic thinking through familiar arithmetical contexts, nurture it by helping students think about, represent and build arguments for their mathematical ideas, develop it by exploring mathematical structures and functional relationships, strengthen it by asking students to make algebraic connections across the curriculum, reinforce it across the grades through a schoolwide initiative. No matter what your math background is, Algebra and the Elementary Classroom offers strong support for integrating algebraic thinking into your daily teaching. Its clear descriptions show you what algebraic thinking is and how to teach it. Its sample problems deepen your own algebraic thinking. Best of all it gives you ideas for grade specific instructional planning. Read Algebra and the Elementary Classroom and prepare your students for a lifetime of mathematical understanding **The Musician**, 1903 **The Arithmetic**

**Teacher**, 1986 **MAA Notes**, 1983 Designing the School Curriculum Peter S. Hlebowitsh, 2005 Designing the School Curriculum takes a practical step by step approach giving students the thorough grounding in the process that leads to confident and effective practitioners. The author emphasizes the discretionary judgment of the individual teacher and acknowledges that the curriculum design process is completed only in the unique and spontaneous learning exchanges between students and teachers. Practical ideas on the formation of school purposes, the design of school wide experiences, effective implementation and the creation of responsive evaluative mechanisms help students to fulfill the goal of the text to

design an authentic and effective curriculum After an introductory chapter examining the role of the teacher in the design process and two brisk chapters leading students through the theoretical foundations of curriculum development the text launches into the curriculum design process giving a close look to each element Hlebowitsh makes a valuable contribution to the field with this new text offering a contemporary treatment of classic curriculum design theory and most importantly equipping students to engage in effective curriculum design themselves     *Masters Abstracts International* ,1996     **The Gardeners' Chronicle** ,1875
