Invigorating High School Math Steven Leinwand, Eric Milou, 2021-08-31 Dramatically Improving High School Mathematics Must Start Now High school math is failing many students Out of date and stale curricula are not only dull but perpetuate inequity by limiting opportunities and failing to prepare a majority of students for life in the 21st century Even traditionalists recognize that the status quo is no longer acceptable Major shifts in course organization mathematical content pedagogy and assessment are long overdue Practical Guidance for Meaningful Transformation Invigorating High School Math is a clarion call for meaningful transformation Throughout the book Steven Leinwand and Eric Milou address the most critical challenges facing high school mathematics and provide practical guidance for addressing challenges and excuses that often short circuit new approaches making the case for the importance of and rationale for changing high school math creating core integrated math courses for grades 9 and 10 and coherent pathways for grades 11 and 12 making critical shifts in pedagogy and classroom practice designing high quality assessments and using them effectively developing and executing a rational implementation plan A Stimulus for Discussion and a Road Map for Change Many of these ideas will not be broadly popular It s likely that none of them will be easy to implement That s no surprise For nearly a century the basic structure of high school mathematics has barely changed not because of its effectiveness but because the status quo is a powerful force requiring purposeful action to break This book was written for every high school math educator and leader as both a stimulus for discussion and a road map for change Our hope say the authors is that this book stimulates change empowers teachers and guides the profession on this critical journey to invigorate high school mathematics
