## **Math 8 For Christian Schools:**

*The Ministry of the Christian School Guidance Counselor* James W. Deuink, 1985 The purpose of this book is to help the reader recognize the importance of pupil personnel services in the Christian school and to provide assistance to those who will initiate such a program in their particular schools Pupil personnel services present a special problem to Christian school administrators Even the smallest school needs all the services we discuss in this volume However when the budget is limited many school officials are reluctant to hire an additional staff member Recognizing the problem a small school faces in providing proper personnel we have made a number of suggestions of ways to combine administrative duties with the traditional role of the counselor We have divided the various duties of the guidance counselor into three categories administrative counseling and clerical Not all of the counselor s activities lend themselves to these divisions but we have followed this approach in the interest of all readers including those who may not be familiar with the guidance aspect of education The first three chapters provide the foundation for the remainder of the book These three chapters along with Chapter 14 are addressed to the administrator and others responsible for the overall supervision of the school Chapters 4 through 13 provide instruction for the one responsible for carrying out the counselor s duties It is our conviction that the ministry of the local Christian school can be greatly enhanced by a well planned program of pupil personnel services We trust that you will give serious consideration to the ideas presented here Preface

Lubienski, Sarah Theule Lubienski, 2013-11-07 Nearly the whole of America s partisan politics centers on a single question Can markets solve our social problems And for years this question has played out ferociously in the debates about how we should educate our children From the growth of vouchers and charter schools to the implementation of No Child Left Behind policy makers have increasingly turned to market based models to help improve our schools believing that private institutions because they are competitively driven are better than public ones With *The Public School Advantage* Christopher A. and Sarah Theule Lubienski offer powerful evidence to undercut this belief showing that public schools in fact outperform private ones For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education including vouchers and charter schools but much of these data are now nearly half a century old Drawing on two recent large scale and nationally representative databases the

Lubienskis show that any benefit seen in private school performance now is more than explained by demographics Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support After correcting for demographics the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones Even more surprising they show that the very mechanism that market based reformers champion autonomy may be the crucial factor that prevents private schools from performing better Alternatively those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care The Public School Advantage offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public
