## **Math America:**

Math America Houghton Mifflin Company, Houghton Mifflin Company Staff, 1991-08-01      *The American Mathematical Monthly*, 1918      **Math Education for America?** Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U.S. culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents, this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing and theorizing the politics of math education, Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital education policy debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers, and the proliferation of profit driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum, he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest.

**Microtrends** Mark Penn, 2007-09-05 The adviser to Senator Hillary Clinton, Bill Gates, and President Bill Clinton proves that small is big by identifying 75 hidden in plain sight trends that are moving America, revealing that the nation is no longer a melting pot but a collection of communities with many individual tastes and lifestyles. The ideas in his book will help you see the world in a new way. Bill Clinton, Mark Penn has a keen mind and a fascinating sense of what makes America tick and you see it on every page of Microtrends. Bill Gates In 1982 readers discovered Megatrends. In 2000 The Tipping Point entered the lexicon. Now in Microtrends one of the most respected and sought after analysts in the world articulates a new way of understanding how we live. Mark Penn, the man who identified Soccer Moms as a crucial constituency in President Clinton's 1996 reelection campaign is known for his ability to detect relatively small patterns of behavior in our culture, microtrends that are wielding great influence on business, politics, and our personal lives. Only one percent of the public or three million people is enough to launch a business or social movement. Relying on some of the best data available, Penn identifies more than 70 microtrends in religion, leisure, politics, and family life that are changing the way we live. Among them: People are retiring but continuing to work. Teens are turning to knitting. Geeks are becoming the most sociable people around. Women are driving technology. Dads are older than ever and spending more time with their kids than in the past. You have to look at and interpret data to know what's going on and that conventional wisdom is almost always wrong and outdated. The nation is no longer a melting pot. We are a collection of communities with many individual tastes and lifestyles. Those who recognize these emerging groups will prosper. Penn shows readers how to identify the microtrends that can transform a business, enterprise, tip an election, spark a movement, or change
