**Mathematical Chestnuts from around the World** Ross Honsberger,2001-01-01 A collection of miscellaneous gems from elementary mathematics ranging from the latest International Olympiads all the way back to Euclid Each one casts light on a striking result or a brilliant device and any reader with only a modest mathematical background will appreciate the ingenious solutions that are also presented

**A Mathematical Space Odyssey** Claudi Alsina,Roger B. Nelsen,2015-12-31 Solid geometry is the traditional name for what we call today the geometry of three dimensional Euclidean space This book presents techniques for proving a variety of geometric results in three dimensions Special attention is given to prisms pyramids platonic solids cones cylinders and spheres as well as many new and classical results A chapter is devoted to each of the following basic techniques for exploring space and proving theorems enumeration representation dissection plane sections intersection iteration motion projection and folding and unfolding The book includes a selection of Challenges for each chapter with solutions references and a complete index The text is aimed at secondary school and college and university teachers as an introduction to solid geometry as a supplement in problem solving sessions as enrichment material in a course on proofs and mathematical reasoning or in a mathematics course for liberal arts students

*A Guide to Functional Analysis* Steven G. Krantz,2013-06-06 This book is a quick but precise and careful introduction to the subject of functional analysis It covers the basic topics that can be found in a basic graduate analysis text But it also covers more sophisticated topics such as spectral theory convexity and fixed point theorems A special feature of the book is that it contains a great many examples and even some applications It concludes with a statement and proof of Lomonosov's dramatic result about invariant subspaces

Dewdney,1999-03-12 A K Dewdney takes readers on a theoretical world tour to answer the question Did humans make up mathematics or did mathematics make up everything

including humans After all mathematical formulas seem to perfectly govern the cosmos and the ur mathematician Pythagoras himself believed that mathematics makes up reality Dewdney has taken it upon himself to examine this fundamental question beginning his journey in Miletus the ancient home of Pythagoras and other deep thinkers There he meets the fictional Dr Petros Pygmonopolis the first of his guides through space and time in search of mathematical meaning in history His journey continues with stops in the Arabian desert for insight into ancient Islamic astronomy with Professor al Flayli Venice where Maria Canzoni reveals the mysteries of atomic theory and England home of the engines of thought in the form of Alan Turing s mind machines as explained by Sir John Brainard Dewdney s style is accessible his knowledge is thorough and his sense of humor is refreshing if a bit geeky A Mathematical Mystery Tour is not a difficult read although the ideas it attempts to clarify are quite abstract The fictional tour guides at each port of call are helpful in humanizing the intimidating subject matter
