Number Literacy

Debby Head, Libby Pollett

Number Literacy:

Number Sense Routines Jessica F. Shumway, 2011 Just as athletes stretch their muscles before every game and musicians play scales to keep their technique in tune mathematical thinkers and problem solvers can benefit from daily warm up exercises Jessica Shumway has developed a series of routines designed to help young students internalize and deepen their facility with numbers The daily use of these quick five ten or fifteen minute experiences at the beginning of math class will help build students number sense Students with strong number sense understand numbers ways to represent numbers relationships among numbers and number systems They make reasonable estimates compute fluently use reasoning strategies e g relate operations such as addition and subtraction to each other and use visual models based on their number sense to solve problems Students who never develop strong number sense will struggle with nearly all mathematical strands from measurement and geometry to data and equations In *Number Sense Routines* Jessica shows that number sense can be taught to all students Dozens of classroom examples including conversations among students engaging in number sense routines illustrate how the routines work how children s number sense develops and how to implement responsive routines Additionally teachers will gain a deeper understanding of the underlying math the big ideas skills and strategies children learn as they develop numerical literacy

Number Sense Routines Jessica Shumway, 2023-10-10 In this groundbreaking and highly practical book *Number Sense Routines Building Numerical Literacy Every Day in Grades K 3* author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise Shumway created a series of math routines designed to help young students strengthen and build their facility with numbers These quick 5 10 or 15 minute exercises are easy to implement as an add on to any elementary math curriculum Understanding Number Sense Students with strong number sense understand numbers how to subitize relationships among numbers and number systems They make reasonable estimates compute fluently use reasoning strategies and use visual models to solve problems *Number Sense Routines* supports the early learner by instilling the importance of daily warm ups and explains how they benefit developing math minds for long term learning Real Classroom Examples Shumway compiled her classroom observations from around the country She includes conversations among students who practice number sense routines to illustrate them in action how children s number sense develops with daily use and math strategies students learn as they develop their numerical literacy through self paced practice Assessment Strategies *Number Sense Routines* demonstrates the importance of listening to your students and knowing what to look for Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy Shumway writes As you read you will step into various classrooms and listen in on students conversations which I hope will give you insight into the power of number sense routines and the impact they have on students number sense development My hope is that going into the classroom into students conversations and into their thought processes you will come away with new ideas and tools to use in

your own classroom *Number Literacy* Debby Head, Libby Pollett, 2000-01-01 *Why Numbers Count* Lynn Arthur Steen, 1997 Numeracy math literacy dominated by the spreadsheet is the currency of modern life This authoritative study makes the case that innumeracy math illiteracy is rapidly becoming an active agent of disenfranchisement Asked how we came to this point the responses of a number of people who deal with math every day are published collectively here and make interesting and sobering reading *Number Literacy* Debby Head, Libby Pollett, 1999 **Numbers and Stories** Rita C. Janes, Elizabeth L. Strong, 2014-03-20 Count on children s books to build number sense Math and reading go hand in hand especially among young children who are new to both If you re looking for a surefire way to build number sense and reading skills at the very same time rely on this indispensable K 2 resource Using children s books as a springboard for standards based learning it provides 22 detailed lessons all ready for immediate implementation The authors one an internationally respected math professional development consultant the other a language arts specialist weave together the Common Core Math and ELA standards and practices supporting you as you combine children s literature with meaningful mathematical learning experiences Their book provides 22 interactive research based investigations with detailed instructional suggestions and problem solving tasks High quality children s book selections Reflection and discussion questions and prompts for both teachers and students Children s work pages and formative assessment tools An online facilitator s guide Read this book try out its investigations and see the results for yourself By pairing the books kids love with the math skills they re building you ll give them a rock solid foundation for future learning **Number Sense Routines** Jessica Shumway, 2023-10-10 Following up her best selling book *Number Sense Routines Building Numerical Literacy Every Day in Grades K 3* Jessica Shumway turns her focus to upper elementary classrooms *Number Sense Routines Developing Mathematical Understanding Every Day in Grades 3 5* is about tapping into every child s innate number sense and providing daily connected experiences that are responsive to children s learning needs Consistent Daily Routines Work Adaptable to any curriculum Shumway s 5 10 or 15 minute warm up routines are an easy and effective way to build and solidify students number sense foundations as a supplement to any program Planning and Facilitating Your Classroom No matter how familiar the routine Shumway provides insight on how to keep daily warm ups fresh She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms Assessment Strategies As students engage in the process each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking Identify Big Ideas Not only will these math routines help develop students mathematical understanding as they move towards using standard algorithms but teachers will learn to better recognize the big ideas that emerge in discussions how to encourage important strategies based in number sense and how to facilitate conversations on key mathematical concepts These routines may appear in other places but I have never seen them written in such detail and with so many variations Although she makes what she does sound easy we all know that teaching math

well is anything but easy It is challenging and complex Unpacking what students are saying helping them make connections not only to the math but to each other s ideas while simultaneously recording their ideas using mathematical models visuals or equations is no easy task Jessica provides wonderful visuals examples of student work and so much more to help educators develop the tools they need to improve their practice and in so doing improve student learning From the Foreword by math coach and consultant Lucy West **Literacy ,1969** **The 9th Annual International Seminar on Trends in Science and Science Education (AISTSSE) 2022** ,2023-10-04

This is the ninth time we are hosting this seminar and we are proud to inform you that this seminar is an annual event in our calendar and has been held every year since 2014 This year for the third year we are holding it via Zoom meeting online meeting due to Covid 19 pandemic We are inviting internationally recognized speakers from several countries to share their latest discoveries in the fields of Biology Chemistry Physics Mathematics and Science Education Well known researchers in science and science education will share their experiences and knowledge so that we can stay up to date with the latest information This is one of the goals of this seminar As science researchers we realize the importance of information exchange among us The new information enlightens our minds and gives us ideas on what to do next in our research and how to do it This new information often becomes the foundation for our next project in particular and sets the research trends for the upcoming year in general Information exchange also keeps us updated allowing us to give and receive suggestions and critiques that will lead to better results Therefore we need a forum where we can share and exchange information Seminars conferences and other scientific gatherings are the media through which we can do this Organizer Faculty of Mathematics and Natural Sciences of Universitas Negeri Medan Where Web Seminar via Zoom Meeting When Tuesday 8th November 2022 Theme The development of industrial based research in science and science education to improve research innovation strategy Topics AISTSSE 2020 included following topics 1 Mathematics Science 2 Mathematics Education 3 Physics Science 4 Physics Education 5 Biology Science 6 Biology Education 7 Chemistry Science 8 Chemistry Education 9 Computer Science 10 Science Education Scientific Committee 1 Prof Dr Syawal Gultom M Pd Universitas Negeri Medan Indonesia 2 Prof Dr Marleen Kamperman University of Groningen Netherland 3 Prof Manihar Situmorang M Sc Ph D Universitas Negeri Medan Indonesia 4 Prof Tsunenori Mine School of Engineering Department of Electrical Engineering and Computer Science Kyushu University Japan 5 Prof Dian Armanto M Pd Universitas Negeri Medan Indonesia 6 Prof Dr Herbert Sipahutar M Sc Universitas Negeri Medan Indonesia 7 Prof Abedel Karrem Nasser M Alomari Department of Mathematics Faculty of Science Yarmouk University Jordan 8 Prof Dr Bornok Sinaga M Pd Universitas Negeri Medan Indonesia 9 Prof Dr Muhammad Sattar Rasul Universitas Kebangsaan Malaysia Malaysia 10 Prof Motlan M Sc Ph D Universitas Negeri Medan Indonesia 11 Prof Dr Asmin M Pd Universitas Negeri Medan Indonesia 12 Prof Dr Fauziyah Harahap M Si Universitas Negeri Medan Indonesia 13 Prof Dr Mukhtar M Pd Universitas Negeri Medan Indonesia 14 Prof Dr Pargaulan Siagian M Pd Universitas Negeri Medan Indonesia 15 Prof Dr Sahat Saragih
