The Art of

Computer Programming Donald Ervin Knuth,2005 New material for Volume 4 will first appear in beta test form as fascicles

of approximately 128 pages each issued approximately twice per year These fascicles will represent my best attempt to write a comprehensive account but computer science has grown to the point where I cannot hope to be an authority on all the material covered in these books Therefore I'll need feedback from readers in order to prepare the official volumes later For

example the following fascicles appeared before the hardcover editions of Volumes 4A and 4B were complete **The Lincoln-Kennedy Coincidences** Jonathan Knight,2023-01-06 This work is a witty exploration of the eerie similarities between the assassinations of presidents Abraham Lincoln and John Kennedy that have fascinated both casual and serious history buffs for more than half a century From the compilation of these mysterious coincidences to the campfire story of a curse cast upon the American presidency this account is filled with captivating anecdotes that are often hard to believe Balancing historical research with a sprinkle of whimsy this book is the most substantial investigation of a nearly folkloric American topic Pulling back the curtain of history it sheds light on what makes these coincidences so intriguing and enduring
