Trotter,2020-04-15 In More Than Medicine LaTonya J Trotter chronicles the everyday work of a group of nurse practitioners NPs working on the front lines of the American health care crisis as they cared for four hundred African American older adults living with poor health and limited means Trotter describes how these NPs practiced an inclusive form of care work that addressed medical social and organizational problems that often accompany poverty In solving this expanded terrain of problems from inside the clinic these NPs were not only solving a broader set of concerns for their patients they became a professional solution for managing difficult people for both their employer and the state Through More Than Medicine we discover that the problems found in the NP s exam room are as much a product of our nation s disinvestment in social problems as of physician scarcity or rising costs Advanced Practice Nursing Michaelene P. health problems determine the appropriate treatment and then administer that treatment Like doctors many nurse practitioners specialize working with a specific age group children adults or seniors or in a particular area of medicine such as oncology psychiatry or gastrointestinal Training and practice of NPs focus on prevention and wellness maintenance and they generally are considered to take a more holistic approach than do doctors do Nurse practitioners are sometimes confused with physician assistants PAs because they often perform similar tasks such as taking patient histories conducting diagnostic tests assisting in surgical procedures and offering counseling and health education to patients PAs receive national certification and may hold bachelor s or even master s degrees But as with registered nurses there is a critical difference PAs must work under the supervision of a physician while nurse practitioners can in many instances work independently of a doctor Many NPs operate their own practices without the presence of a supervising physician This is currently the case in more than a dozen states and more states are permitting this each year The demand for primary care health services is growing and there are simply not enough family doctors to fill the need nor are there expected to be enough for many years to come This is especially true in rural America as well as in the poorer sections of urban America This new Careers Ebook contains a wealth of unbiased information about an occupational field based on the latest national surveys Careers Ebooks cover attractive and unattractive sides opportunities education necessary personal qualifications required earnings descriptions of different job specialties first person accounts by those in the field and how to get started including practical advice on what to do now There are live links to schools and colleges associations periodicals and other sources of reliable information
