Bishop, John R. Scudder, 1996 Although ethics is an integral aspect of nursing practice courses in nursing ethics all too often teach ethics through traditional philosophical theory This text explores the ethics that stems directly from the moral dimension of nursing as it is rooted in everyday practice Using practical examples that present ethical issues as they naturally arise the authors demonstrate that integrating the motivation to care and the practice of care will help nurses fulfill the moral sense of their jobs as caretakers The last chapter is a dialogue between the authors in which they discuss and interpret the major cases presented in the previous chapters This practical interpretive text provides a unique approach to nursing ethics that bridges the gap between philosophical study and

nursing practice      *Nursing Ethics* Janie Butts, Karen Rich, 2008 Newly revised and updated the Second Edition of this leading ethics textbook integrates nursing ethics content throughout the nursing curriculum preparing students and professionals for moral issues encountered in daily practice Nursing Ethics Across the Curriculum and Into Practice derives its theoretical foundations from clinical evidence and case studies Emphasizing the collaborative nurse patient relationship in care this text includes decision making approaches and models rationale for decisions and management of care for various situations      *Key Concepts and Issues in Nursing Ethics* P. Anne Scott, Shane M. Scott, 2024-11-15 This second edition offers updates new topics and new short case studies based on real stories from the health care arena ensuring that each chapter of this book is rooted in descriptions of nursing practise that are grounded salient narratives of nursing care The reader is assisted to explore the ethical dimension of nursing practice what it is and how it can be portrayed discussed and analysed within a variety of practice and theoretical contexts One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse patient relationship but also as a social good that is of necessity limited due to the ultimate limits on the nursing and health care resource This book will help the reader consider what good nursing looks like both within the context of limitations on resources during crises situations and under conditions of scarcity Indeed any discussion of ethical issues in nursing should be well grounded in a conceptualisation of nursing that nursing students and practising nursing can recognise accept and engage with Nursing like medicine social work and teaching has a clear moral aim to do good In the case of nursing to do good for the patient However it is vital that in the pressurised constrained post COVID 19 pandemic health service of the 21st century we help nurses explore what this might mean for nursing practice and what can reasonably be expected of the individual nurse and the nursing profession in terms of good nursing care
