

The 5 Steps of Mastery Learning

1

Pre-Assessment

Ensure students have previously mastered the skills or knowledge necessary to move into the current material.

If the student does not have the needed competencies, the teacher moves backward to ensure student master the previous material before moving forward.

2

Instruction

Once students have exhibited competency in the foundational skills or knowledge necessary to the current material, the teacher will begin instruction.

Clearly communicate the mastery grading scale that will use to determine if students have exhibited competency.

3

Formative Assessment

After the instruction stage, teachers will assess students' skills and knowledge through formative assessment.

Formative assessment can measure student comprehension through a variety of methods - anything from exit tickets to homework assignments to classroom polls.

4

Correction or Enrichment

Students who demonstrate high competency can continue to grow their knowledge and skills through personalized enrichment activities.

Those who have not demonstrated mastery are given additional personalized enrichment and corrective instruction from the teacher.

5

Summative Grading

Once a teacher believes all students are at or close to mastery, the teacher offers a cumulative test, essay, or project to assess if each student has mastered the content.

Those who do not score at the master level simply require additional time and support to reach that level of competency.

Classrooms for Small-group Instruction Carolyn M. Lawrence,Gordon Lawrence,Linda S. Samek,2006 Here is an antidote

to the stifling academic grind brought on by accountability testing It demonstrates how mastery of skills can be a joy rather than a chore and describes in detail a highly successful program of structured skill mastery centers that engage students independently while the teacher works closely with a small group This system of managing the classroom helps the teacher provide materials that match the many achievement levels of children in the classroom Typically in use for 60 90 minutes in a school day up to four days a week the system works well with the whole language or the guided practice approaches to reading The program developed by Carolyn Lawrence is being used successfully throughout 63 elementary schools in one Florida school district Many of the schools are nationally recognized for their achievement in test scores The ideas in this book are simple clear and ready to use to bring back excitement freedom and smiles to children in their classroom life Students are eager to get to the skill practice work in the mastery centers largely because they get to use a variety of manipulative materials matched to their levels These materials are inexpensive readily available and described in the book This book will be of interest to professors of education superintendents curriculum and instruction educators principals teachers and parents

Instructional Leadership Handbook James W. Keefe, John M. Jenkins, 1984

Instructional leadership is the principal's role in providing direction, resources, and support to teachers and students for the improvement of teaching and learning in the school. This handbook reviews factors affecting that role in four broad domains: keeping informed about trends, planning for instructional improvement, implementing instructional improvements, and evaluating program success. The first section surveys the range of information with which principals must be familiar in order to provide knowledgeable guidance, including trends in instruction in specific content areas, trends in organization and staffing, and trends in media and methods. The second section discusses the application of planning techniques to instructional development, touching on needs assessment, goal setting, standards, and competency measurement, and obtaining support. Program implementation is covered in the third section, which explores program organization and the supervision of classroom management, the diagnostic process, student placement, and instructional practices. The final section treats the elements of the evaluation process, including assessment and reporting of progress, evaluation of teacher performance, obtaining and using community feedback, and modifying the program.
