aportar a la discusión con una visión crítica y constructiva. Un grupo de destacados académicos e investigadores de la UC la mayoría de ellos participaron también en el libro anterior abordan con una mirada renovada temas como la autonomía universitaria, el marco regulatorio de la educación, el aseguramiento de la calidad, la educación inicial, las políticas de inclusión, la ley de desmunicipalización, la carrera docente, la educación técnico profesional, el acceso y admisión a la educación superior, las formas de financiamiento, el desarrollo de las ciencias y la innovación, los estudiantes con necesidades educativas especiales, el aprendizaje de la diversidad y la formación ciudadana, entre otros. Se incluyen también nuevos enfoques que forman parte integral del quehacer educativo, particularmente en la educación superior. Estos son la formación general, el programa de Licenciatura en Estudios Generales o College y el área de gestión de asuntos estudiantiles. En varios temas, el libro expresa más de una visión, lo cual da cuenta de la diversidad del pluralismo y de la riqueza de la investigación de los académicos.

Enseñar y aprender en la universidad, 2003. 3-2 Ideas Clave. El desarrollo de la competencia matemática. Jesús M. a Goñi Zabala, 2008-07-09. El libro reflexiona sobre la diferencia entre dos maneras distintas de enfocar la enseñanza de las matemáticas: las matemáticas como área de conocimiento del currículo de la educación y o las matemáticas como competencia clave o básica para el aprendizaje. De estructura clara, además de las ideas que propone para el desarrollo de la competencia matemática, el libro incide en la importancia de la innovación y el cambio para mejorar la capacitación docente. Las ideas clave planteadas ayudan a responder a preguntas tales como: ¿Cuál es la razón que justifica la presencia de las matemáticas en el currículo? Desde qué perspectiva deben definirse las finalidades que debe lograr la enseñanza de las matemáticas? Por qué debe centrarse la enseñanza de las matemáticas en el desarrollo de la competencia matemática y qué debemos entender por competencia matemática.

Universidad y nación. Sol Serrano, 2016. No deja de sorprender que el tema de este libro, la historia de la Universidad de Chile en su periodo fundacional, sea hoy más candente de lo que fuera cuando se publicó. En los últimos años, el sistema universitario ha estado en el centro del debate público como no lo había estado desde las grandes reformas de fines de los años 1960 del siglo pasado. El argumento de esta investigación nace de un debate de la década de los años 1980 que era la relación entre Estado y sociedad civil en un periodo en que el Estado de bienestar había transitado hacia un Estado subsidiario en el contexto de una dictadura. Interesaba comprender históricamente la construcción del Estado desde una de sus facetas que era la educación. El libro sostiene básicamente que la fundación de la Universidad de Chile fue un proyecto político de una élite ilustrada, propio de la construcción de la nación moderna para incorporar el conocimiento moderno a la transformación de la sociedad en distintos niveles: en la investigación, en la formación profesional y en la formación de un sistema educacional civilizatorio que llegara al conjunto de la población. Era un proyecto político de suyo secularizador. La educación estuvo en el centro del conflicto entre un Estado católico y un Estado laico; entre Estado docente y libertad de enseñanza; finalmente era un conflicto sobre la definición de lo público y lo privado. Es en este conflicto donde el libro engarza con el debate de esta década del siglo XIX.
