Maternal Instincts

Beth Henderson

Maternal Instincts:

Mother Nature Sarah Blaffer Hrdy, 1999 We are tempted to think of maternal instinct as a quality a woman has or lacks. But the belief that mothers instinctively nurture their offspring one of the West's most cherished ideals and a view widely accepted even in scientific circles has become increasingly controversial. Mother Nature presents a radical new way of understanding how mothers act and why and how this new understanding is changing the way scientists think about how evolution works. Drawing on anthropology, history, literature, developmental psychology, and animal behavior, Sarah Hrdy examines the distinct biological and genetic elements that constitute maternal instinct. She strips away the biases implicit in conventional stereotypes of female nature to give us very different and provocative perspectives on maternal ambivalence, the links between maturity and ambition, mother love and sexual love, and why age-old tensions between the sexes persist and are being played out today in efforts to control women's reproductive choices. Combining decades of research with her own experience as a mother, Hrdy makes clear in this remarkable book what it means from a historical and evolutionary perspective to be a mother and explains how this knowledge has transformed our understanding of human development and behavior.

Maternal Instincts Ann Sumner Holmes, Claudia Nelson, 1997-12-13 *Maternal Instincts* brings together seven new essays exploring conflicting visions of motherhood and sexuality in a period during which both terms were undergoing radical change. Representations of both concepts mutated to accommodate different cultural contexts and individual ideologies. Drawing upon sources including literature, film, medical handbooks, popular science, and legal records, the articles collected here construct a vision of motherhood as alternately idealized, discredited, and fragmented by virtue of its connection with sexualities licit and illicit.

Uncovering the Act of Maternal Infanticide from a Psychological, Political, and Jungian Perspective Brooke Laufer,2024-07-02 Using a wide range of disciplinary

backgrounds Laufer examines the topic of maternal infanticide through the lens of Jungian theory and presents an integrated and forensic view of this issue as an aggregate of personal and political moments and as a feminine and feminist outcry urging human evolution The first part of the book will dissect the identity of the infanticidal mother and the Death Mother archetype with the author providing firsthand accounts of patients that she has worked with in her professional career The second part of the book focuses on interpreting that act of maternal infanticide and these chapters will look to the construct of patriarchal Motherhood as a way of explaining the drive and actions of an infanticidal mother The third and final section of the book takes the concept of evolution and transmutation a step further and addresses what is required in our modern state for the event of maternal infanticide This is an important new book for Jungian and analytic clinicians and scholars with an interest in maternal archetypes as well as psychologists and psychiatrists who specialize in perinatal mental health It would also be appropriate for forensic psychologists and legal analysts and academics and clinicians in the fields of women s health and studies
