Curriculum Reform Project, 1994 This literature review is the first phase of an extensive review of curriculum reform in science mathematics and higher order thinking across the disciplines. The first of eight sections is an executive summary addressing the major themes of the document. The second section deals with several general issues of curricular reform concerning teaching and learning. The next three sections address separate aspects of school curriculum mathematics science and higher order thinking across the disciplines. Each subject and section explores the historical context from which curriculum reform in this area emerges. Characteristics of curriculum reform required changes in curriculum and current projects under way. The sixth section covers the process of curriculum reform. It is a multifaceted process that varies substantially from one time and setting to another. The next section addresses the context for reform in this country with attention given to national state and regional efforts at curriculum reform. The final section addresses the implications for the Curriculum Reform Project for which this review of literature provided a foundation. A bibliography and a list of other Studies of Education Reform Program reports and a bibliography of 251 references are included.
