Wood, 2010-01-28 This edition features the exact same content as the traditional text in a convenient three hole punched loose leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. This book is ideal for one or two semester or two or three quarter courses covering topics in college algebra, finite mathematics and calculus for students in business, economics and the life and social sciences. Haeussler, Paul and Wood establish a strong algebraic foundation that sets this text apart from other applied mathematics texts, paving the way for students to solve real world problems that use calculus. Emphasis on developing algebraic skills is extended to the exercises including both drill problems and applications. The authors work through examples and explanations with a blend of rigor and accessibility. In addition, they have refined the flow, transitions, organization and portioning of the content over many editions to optimize manageability for teachers and learning for students. The table of contents covers a wide range of topics efficiently enabling instructors to tailor their courses to meet student needs. *Introductory Mathematical Analysis for Business, Economics,*
