Mathematical Classification And Clustering:

   Mathematical Classification and Clustering Boris Mirkin,2013-12-01 I am very happy to have this opportunity to present the work of Boris Mirkin a distinguished Russian scholar in the areas of data analysis and decision making methodologies The monograph is devoted entirely to clustering a discipline dispersed through many theoretical and application areas from mathematical statistics and combina torial optimization to biology sociology and organizational structures It compiles an immense amount of research done to date including many original Russian de velopments never presented to the international community before for instance cluster by cluster versions of the K Means method in Chapter 4 or uniform par titioning in Chapter 5 The author s approach approximation clustering allows him both to systematize a great part of the discipline and to develop many in novative methods in the framework of optimization problems The optimization methods considered are proved to be meaningful in the contexts of data analysis and clustering The material presented in this book is quite interesting and stimulating in paradigms clustering and optimization On the other hand it has a substantial application appeal The book will be useful both to specialists and students in the fields of data analysis and clustering as well as in biology psychology economics marketing research artificial intelligence and other scientific disciplines Panos Pardalos Series Editor   Classification and Clustering J. Van Ryzin,2014-05-10 Classification and Clustering documents the proceedings of the Advanced Seminar on Classification and Clustering held in Madison Wisconsin on May 3 5 1976 This compilation discusses the relationship between multidimensional scaling and clustering distribution problems in clustering and botryology of botryology The graph theoretic techniques for cluster analysis algorithms data dependent clustering techniques and linguistic approach to pattern recognition are also elaborated This text likewise covers the discriminant analysis when scale contamination is present in the initial sample and statistical basis of computerized diagnosis using the electrocardiogram Other topics include the simple histogram method for nonparametric classification and optimal smoothing of density estimates This book is intended for mathematicians biological scientists social scientists computer scientists statisticians and engineers interested in classification and clustering   Classification, Clustering, and Data Analysis Krzystof Jajuga,Andrzej Sokolowski,Hans-Hermann Bock,2012-12-06 The present volume contains a selection of papers presented at the Eighth Conference of the International Federation of Classification Societies IFCS which was held in Cracow Poland July 16 19 2002 All originally submitted papers were subject to a reviewing process by two independent referees a procedure which resulted in the selection of the 53 articles presented in this volume These articles relate to theoretical investigations as well as to practical applications and cover a wide range of topics in the broad domain of classifi cation data analysis and related methods If we try to classify the wealth of problems methods and approaches into some representative partially over lapping groups we find in particular the following areas Clustering Cluster validation Discrimination Multivariate data analysis Statistical methods Symbolic data analysis Consensus trees and phylogeny Regression trees

Neural networks and genetic algorithms Applications in economics medicine biology and psychology Given the international orientation of IFCS conferences and the leading role of IFCS in the scientific world of classification clustering and data analysis this volume collects a representative selection of current research and modern applications in this field and serves as an up to date information source for statisticians data analysts data mining specialists and computer scientists   *Mathematics of Data Science* Daniela Calvetti,Erkki Somersalo,2020-11-20 This textbook provides a solid mathematical basis for understanding popular data science algorithms for clustering and classification and shows that an in depth understanding of the mathematics powering these algorithms gives insight into the underlying data It presents a step by step derivation of these algorithms outlining their implementation from scratch in a computationally sound way Mathematics of Data Science A Computational Approach to Clustering and Classification proposes different ways of visualizing high dimensional data to unveil hidden internal structures and nearly every chapter includes graphical explanations and computed examples using publicly available data sets to highlight similarities and differences among the algorithms This self contained book is geared toward advanced undergraduate and beginning graduate students in the mathematical sciences engineering and computer science and can be used as the main text in a semester course Researchers in any application area where data science methods are used will also find the book of interest No advanced mathematical or statistical background is assumed

Clustering and Classification Phipps Arabie,Geert de Soete,1996 At a moderately advanced level this book seeks to cover the areas of clustering and related methods of data analysis where major advances are being made Topics include hierarchical clustering variable selection and weighting additive trees and other network models relevance of neural network models to clustering the role of computational complexity in cluster analysis latent class approaches to cluster analysis theory and method with applications of a hierarchical classes model in psychology and psychopathology combinatorial data analysis clusterwise aggregation of relations review of the Japanese language results on clustering review of the Russian language results on clustering and multidimensional scaling practical advances and significance tests   Classification, Clustering, and Data Mining Applications David Banks,Leanna House,Frederick R. McMorris,Phipps Arabie,Wolfgang A. Gaul,2011-01-07 Modern data analysis stands at the interface of statistics computer science and discrete mathematics This volume describes new methods in this area with special emphasis on classification and cluster analysis Those methods are applied to problems in information retrieval phylogeny medical diagnosis microarrays and other active research areas
