Italy EPFL Lausanne Switzerland University of Bergamo Italy and Emory University Atlanta USA It aims at introducing students to the numerical approximation of Partial Differential Equations PDEs One of the difficulties of this subject is to identify the right trade off between theoretical concepts and their actual use in practice With this collection of examples and exercises we try to address this issue by illustrating academic examples which focus on basic concepts of Numerical Analysis as well as problems derived from practical application which the student is encouraged to formalize in terms of PDEs analyze and solve The latter examples are derived from the experience of the authors in research project developed in collaboration with scientists of different fields biology medicine etc and industry We wanted this book to be useful both to readers more interested in the theoretical aspects and those more concerned with the numerical implementation **Numerical Methods for the Solution of Ill-Posed Problems** A.N. Tikhonov,A. Goncharsky,V.V. Stepanov,Anatoly G. Yagola,2013-03-09 Many problems in science technology and engineering are posed in the form of operator equations of the first kind with the operator and RHS approximately known But such problems often turn out to be ill posed having no solution or a non unique solution and or an unstable solution Non existence and non uniqueness can usually be overcome by settling for generalised solutions leading to the need to develop regularising algorithms The theory of ill posed problems has advanced greatly since A N Tikhonov laid its foundations the Russian original of this book 1990 rapidly becoming a classical monograph on the topic The present edition has been completely updated to consider linear ill posed problems with or without a priori constraints non negativity monotonicity convexity etc Besides the theoretical material the book also contains a FORTRAN program library Audience Postgraduate students of physics mathematics chemistry economics engineering Engineers and scientists interested in data processing and the theory of ill posed problems **Scientific and Technical Aerospace Reports** ,1983 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **An Introduction to Numerical Methods and Analysis** James F.
