McKenna, 2014 Applying the Roper-Logan-Tierney Model in Practice Jane Jenkins, BA MSc SRN RNT, Jackie Solomon, MA, PGDip, SRN, Sue Whittam, Karen Holland, 2008-06-03 This title is directed primarily towards health care professionals outside of the United States Applying the RLT Model in Practice has been written to enable students and their teachers in both Higher Education and clinical practice to explore the different dimensions of the model through a variety of case studies and exercises The case studies can be viewed as triggers for student problem solving skills in using the Model Many of the exercises are aimed at enabling readers to find evidence to support nursing activities The authors have incorporated an international perspective throughout the text Based on the most popular model used in general nursing care throughout the world Explicitly demonstrates how the RLT model can be used to assess plan deliver and evaluate individualised nursing care Applies the RLT model in the context of today's health services and links it to clinical governance and the multi disciplinary context of care Uses a problem solving approach with extensive use of exercises and case studies Attractive two colour design using boxes tables and summaries Fully updated throughout in line with changes in practice developments in the evidence base changes in the NHS e.g modern matrons Modernisation Agency etc More material on how to apply the model in an inter disciplinary context Updated infection control section More on discharge planning More material relating to primary care *Conceptual Nursing in Practice* Mary Fraser, 2013-11-11 Since 1990 there has been considerable development in research in nursing practice which uses a model of nursing This is due to many

reasons However the aims of this book remain the same as for the first edition to present the reader with current reports of studies in nursing practice which use a model of nursing as their base I will also criticize the research methods that the studies use to give the reader an indication of the credibility of the findings as well as commenting on the popularity of the model in different countries and cultures A development that is possible since the last edition is the ability to give some indication of why the model of nursing was used in other words what was the author's intention in studying nursing practice in depth with the use of a model This will give some indication of the implications of the author's work I will develop this point further in the Introduction to this edition Therefore this edition is not simply an updating of further studies published since 1990 Since the last edition there has also been some comment on the models that I included I am grateful to Margaret Clarke 1991 and others who have pointed out that Neuman's model should be included and there is therefore a chapter devoted to this in this edition
