Modelisation 3d Automatiq:

Modélisation 3D automatique François Goulette,1999 Three-Dimensional Model Analysis and Processing Faxin Yu,Zheming Lu,Hao Luo,Pinghui Wang,2011-02-03 With the increasing popularization of the Internet together with the rapid development of 3D scanning technologies and modeling tools 3D model databases have become more and more common in fields such as biology chemistry archaeology and geography People can distribute their own 3D works over the Internet search and download 3D model data and also carry out electronic trade over the Internet However some serious issues are related to this as follows 1 How to efficiently transmit and store huge 3D model data with limited bandwidth and storage capacity 2 How to prevent 3D works from being pirated and tampered with 3 How to search for the desired 3D models in huge multimedia databases This book is devoted to partially solving the above issues Compression is useful because it helps reduce the consumption of expensive resources such as hard disk space and transmission bandwidth On the downside compressed data must be decompressed to be used and this extra processing may be detrimental to some applications 3D polygonal mesh with geometry color normal vector and texture coordinate information as a common surface representation is now heavily used in various multimedia applications such as computer games animations and simulation applications To maintain a convincing level of realism many applications require highly detailed mesh models However such complex models demand broad network bandwidth and much storage capacity to transmit and store To address these problems 3D mesh compression is essential for reducing the size of 3D model representation

Noblesse Workshop on Non-Linear Model Based Image Analysis Stephen Marshall,Neal R. Harvey,Druti Shah,2012-12-06 This book contains papers presented at the Noblesse Workshop on Non linear model based image analysis held in Glasgow 1 3 July 1998 Current models have mainly been developed for image coding purposes They are rather simple and far away from being optimal and do not contribute to more complex tasks like those needed in image databases This book meets the challenging tasks in multimedia applications by discussing new sophisticated model based schemes for a high level description of images and image sequences Novel results are covered in the papers presented in this book opening new potential fields of application like the support for building databases in multimedia applications image archiving and image sequence coding including such topics as 3D Image Models Image Video Restoration Segmentation and Object Oriented Coding Colour Image Processing Database Retrieval Image Models Video Pre and Post processing
