Modelling Biological Populations In Space And Time:

Modelling Biological Populations in Space and Time Eric Renshaw,1993-08-26 This volume develops a unifying approach to population studies emphasising the interplay between modelling and experimentation Throughout mathematicians and biologists are provided with a framework within which population dynamics can be fully explored and understood Aspects of population dynamics covered include birth death and logistic processes competition and predator prey relationships chaos reaction time delays fluctuating environments spatial systems velocities of spread epidemics and spatial branching structures Both deterministic and stochastic models are considered Whilst the more theoretically orientated sections will appeal to mathematical biologists the material is presented so that readers with little mathematical expertise can bypass these without losing the main flow of the text

Modelling in Applied Biology ,1996 Journal of Applied Probability ,1997 □□□□□□□□□□ ,1995 *Frontiers of Population Ecology* R. B. Floyd,Andrew Walter Sheppard,Paul Joseph De Barro,1996 This book provides a contemporary view of the major issues facing ecologists and outlines some of the strengths and weaknesses of the current ecological framework and its utility in managing biological systems It includes contributions from world experts and looks at important themes including theoretical and experimental population ecology the conservation of endangered species the management of pests and the sustainable management of resources The chapters deal with a wide range of organisms including plants pathogens insects molluscs birds marine and terrestrial mammals New technologies and approaches are also covered

Unifying Themes In Complex Systems Yaneer Bar-yam,1999 The study of complex systems has attracted a broad range of researchers from many disciplines spanning both the hard and soft sciences In the Autumn of 1997 300 of these researchers came together for the First International Conference on Complex Systems The proceedings of this conference is the first book in the New England Complex Systems Institute series on Complexity and includes more than 100 presentations and papers on such topics as evolution emergence complexity self organisation scaling informatics time series emergence of mind and engineering of complex systems This research is expected to be a precursor to an explosive growth of interest in this field
