Models Of Spatial Inequality:

Models of Spatial Inequality Robert Paynter, 1982 *Urbanization and Growth* Michael Spence, Patricia Clarke Annez, Robert M. Buckley, 2008-11-26 Why is productivity higher in cities Does urbanization cause growth or does growth cause urbanization Do countries achieve rapid growth or high incomes without urbanization How can policy makers reap the benefits of urbanization without paying too high a cost Does supporting urbanization imply neglecting rural areas Why do so few governments welcome urbanization What should governments do to improve housing conditions in cities as they urbanize Are innovations in housing finance a blessing or a curse for developing countries How will governments finance the trillions of dollars of infrastructure spending needed for cities in developing countries First in a series of thematic volumes this book was prepared for the Commission on Growth and Development to evaluate the state of knowledge of the relationship between urbanization and economic growth It does not pretend to provide all the answers but it does identify insights and policy levers to help countries make urbanization work as part of a national growth strategy It examines a variety of topics the relevance and policy implications of recent advances in urban economics for developing countries the role of economic geography in global economic trends and trade patterns the impacts of urbanization on spatial inequality within countries and alternative approaches to financing the substantial infrastructure investments required in developing country cities Written by prominent academics in their fields *Urbanization and Growth* seeks to create a better understanding of the role of urbanization in growth and to inform policy makers tackling the formidable challenges it poses Practical Microsimulation Modelling Cathal O'Donoghue, 2021 This book brings together a description and examples of the main methods used in microsimulation modelling used in the field of income distribution analysis It is structured to develop and use the different types of models used in the field with a focus on household targeted policy **Total Socioenvironmental Systems** Yichun Xie, 2023-10-13 This book presents a new analytical framework and several newly developed quantitative methods to investigate the interactions between climatic ecological and socioeconomic factors as a total socioenvironmental system TSES Facing the increasingly imperiled ecosystems around the world understanding the complex relationships between humans and environments is of utmost importance This book offers several solutions to these challenges based on the author's research and illustrates them with case studies and annotated data sets It develops the conceptual framework of a TSES emphasizing the identification of causal relationships as a starting point to investigating the interactions between biophysical phenomena and socioeconomic factors The book experiments with various spatial data assimilation techniques such as GIS for matching diverged areal units over which biophysical and socioeconomic datasets are collected Trend extraction methods including machine learning for synchronizing distinct temporal rhythms hidden in biophysical and socioeconomic phenomena to augment their causal relationships are explored as well The book also examines sustainability in urban systems social systems and ecosystems This volume will be useful to readers across many disciplines including but not limited to geographic

Encyclopedia of Geography Barney Warf, 2010-09-21 Simply stated geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1 200 entries the Encyclopedia of Geography reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century.

Key Features Gives a concise historical sketch of geography's long rich and fascinating history including human geography physical geography and GIS. Provides succinct summaries of trends such as globalization environmental destruction new geospatial technologies and cyberspace. Decomposes geography into the six broad subject areas physical geography human geography nature and society methods models and GIS history of geography and geographer biographies geographic organizations and important social movements. Provides hundreds of color illustrations and images that lend depth and realism to the text. Includes a special map section.

Key Themes Physical Geography Human Geography Nature and Society Methods Models and GIS People Organizations and Movements History of Geography. This encyclopedia strategically reflects the enormous diversity of the discipline the multiple meanings of space itself and the diverse views of geographers. It brings together the diversity of geographical knowledge making it an invaluable resource for any academic library.

Rethinking Spatial Inequality Linda M. Lobao, Gregory Hooks, 2025-07-15 This illuminating book offers a new perspective on social science inquiry into the spatial dimensions of societal well being addressing the key question of who gets what and where.

International Encyclopedia of the Social & Behavioral Sciences Neil J. Smelser, Paul B. Baltes, 2001 The largest work ever published in the social and behavioural sciences. It contains 4000 signed articles 15 million words of text 90 000 bibliographic references and 150 biographical entries.

Spatial Modeling for Social Inequality Erik D. Mueller, 2015

The concept of need and servicing has been a cornerstone of public service research since its inception although the methods for modeling and assessing need have changed dramatically as technology has allowed for higher level data aggregation and processing techniques to be employed. Modeled after Heflin and Miller's research study on *The Geography of Need: Identifying Human Service Needs in Rural America* this thesis examines need and inequality from a geographic perspective employing geographic information systems spatial statistics and modeling techniques to provide a representation of inequality and need across the state of Missouri. Methods for variable selection include the employment of qualitative research and factor analysis along with geographically weighted regression for the development of weights for variables.

included in the final model Following the construction of profiles to represent specific categories of inequality results showed that economic variables included in the analysis were most influential in the overall construction of the models followed by demographic socio cultural and environmental variables respectively

Quantitative Methods in Landscape Ecology
Monica Goigel Turner, R. H. Gardner, 1991 Quantitative Methods in Landscape Ecology Monica G. Turner, Robert H. Gardner, 1991 Landscape ecology as a modern interdisciplinary science is making use increasingly of quantitative research techniques adopted from other fields So far no synthetic reference has been available to those wishing to acquaint themselves with new approaches to quantitative analysis of spatial heterogeneity at the landscape level This book seeks to meet this need by providing a conceptual framework and illustrating potential applications for methods such as pattern analysis spatial statistics fractals modeling broad scale studies and extrapolation across scales Each technique is discussed in sufficient detail to be adaptable to a variety of research problems Quantitative Methods in Landscape Ecology will be an important resource for researchers and students of landscape and ecosystem ecology in understanding and analyzing the dynamics of complex spatial systems *Examining the Distributional Effect of Economic Structure Within an Extended Endogenous Growth Framework* Kwang-Koo Kim, 2002 *Environment & Planning A*, 1977 **Uniform Trade List Annual**, 1977 *Environment & Planning*, 2002-07 *The Nature of Underdevelopment and Regional Structure of Nepal* Bāburāma Bhaṭṭarāī, 2003 Probes From A Historico Materialist Perspective And Substantiates With Data Why Nepal Needs A Rupture From The Past To Get Out Of Underdevelopment And Come To Rapid Progress And Development Based On Marxist Interpretation Of Nepalese History And Economy A Welcome Addition To The Literature Of Marxist Political Economy *The Theory and Practice of Archaeology* Thomas C.
