Models Of Sustainable Development

Akira Onishi

Models Of Sustainable Development:

Models of Sustainable Development Sylvie Faucheux,David Pearce,John L. R. Proops,1996 Theory and Implementation of Economic Models for Sustainable Development J.C. van den Bergh,M.W. Hofkes,1998-06-30 There is widespread concern for long term environmental issues in relation to economic processes and developments Among the concerned scientists are economists who have taken up the challenge to apply economic insights and tools for the study of long term environment economy interactions and to give the concept of sustainable development economic hands and feet This book presents a pluralistic perspective on efforts problems and successes in this area This collection of papers was originally prepared for an international symposium titled Economic Modelling of Sustainable Development Between Theory and Practice which was hosted by the Vrije Universiteit in Amsterdam on December 20th 1996 The main motivation for this symposium was that the usefulness of the concept of sustainable development for theoretical and applied modelling is still being debated growth theorists resource economists ecological economists policy makers and many others are trying to deal with the concept in various and sometimes conflicting ways The aim of the symposium was to bring together different theoretical and implementational perspectives on modelling for sustainable development We hope that this volume will inform a wide audience about the perspectives and progress in this important area of research as well as stimulate further research notably on applied modelling and practical methods for the analysis of sustainable development at various spatial scales The papers have in due course been revised several times based on comments made by discussants referees and the editors *Natural Resources, Development Models and Sustainable Development* Richard M. Auty,International Institute for Environment and Development,2009

History, Definition(s) and Models of Sustainable Development Marco Keiner,Eidgenössische Technische Hochschule (Zürich). Institut für Raum- und Landschaftsentwicklung,2005 *Innovative Models for Sustainable Development in Emerging African Countries* Niccolò Aste,Stefano Della Torre,Cinzia Talamo,Rajendra Singh Adhikari,Corinna Rossi,2019-12-30 This open access book explores key issues and presents recent case studies in areas of importance for the transition to a circular model of development in emerging African countries that will minimize resource consumption and waste production The topics covered include the development of sustainable housing models energy and environmental issues in building design and technical systems recycling for a sustainable future models for humanitarian emergencies and low cost and web based digital tools with applications in architecture and archaeology The aim is to contribute to a necessary paradigm shift with respect to urban planning and usage of territories moving from a linear urban metabolism based on the take make dispose approach to a circular metabolism Such a change requires a focus on the relationship between the architectural urban and physical aspects of new developments climate and energy demand as well as the identification and integration of strategies and infrastructures to achieve a high level of efficiency and self sufficiency The book will appeal to all with an interest in sustainable development in the African context **Natural**

Resources, Development Models and Sustainable Development Richard M. Auty,2003 *Integrated Global Models of Sustainable Development* Akira Onishi,2009 *Models of Sustainability and Sustainable Development* Mark Diesendorf,1998 **Integrated global models of sustainable development** Akira Onishi,2009 *Business Models and Sustainable Development Goals* Prescott C. Ensign,2022 This Special Issue on Business Models and Sustainable Development Goals SDG presents five research studies that examine transformative business models designed to support the United Nations SDG Agenda for 2030 The studies examine SDGs from the firm to national levels Every organization has a business model that defines how the organization is designed to function It is the engine that powers an organization defining the value proposition of the venture how it balances resources with the ecosystem where it operates and how it generates cash flow and creates value Changes to an organization s business model are recognized as a fundamental approach to implementing innovations for sustainability The capability to transform or transition to new business models is an important source of competitive advantage providing leverage to improve the performance of an organization A sustainable business model includes pro active management monetary and non monetary value for a broad range of stakeholders and takes a long term perspective A sustainable business model is where change success and hope for our planet s future rests [Integrated Global Models of Sustainable Development - Volume I](#) Akira Onishi,2009-08-18 Integrated Global Models of Sustainable Development is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias In the 21st century the human society is facing the challenge of sustainable development with constraints of global environmental changes In order to cope with poverty and international per capita income disparity IPCID there should be further needs for economic development to provide employment opportunities against Terrorism and refugees The coverage in three volumes tires to show a possibility of sustainable development from a global viewpoint by using alternative policy simulations The chapters are organized so that the readers might understand archived historical trends in global modeling for sustainable development Starting from global models in the 1970s 1980s 1990s the updated latest modeling works are also included as far as possible The chapters deal with roles of integrated global models scope and methodologies and policy implications These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **Handbook of Research on International Business and Models for Global Purpose-Driven Companies** Perez-Uribe, Rafael Ignacio,Largacha-Martinez, Carlos,Ocampo-Guzman, David,2020-11-20 International businesses struggle to be competitive and influential at the global market level With the new ideas in the management and leadership disciplines hard skills are losing or are believed to be losing their strategic relevance while soft skills are praised and highly sought after The Handbook of Research on International Business and Models for Global Purpose Driven Companies a pivotal reference source

provides vital research on international business management strategies and applications within internal organizations that allow companies to strategically position themselves for increased success in the global economy While highlighting topics such as organizational culture internal communication and generational workforce this publication explores leadership disciplines as well as the methods of handling multicultural organizations This book is ideally designed for entrepreneurs executives managers business professionals human resource officials researchers academicians and students

Corporate Social Responsibility R. K. Narang,2009 **Dynamic Models for Sustainable Development** Jeroen C. J. M. van den Bergh,2003-08-20 Discusses dynamic models for sustainable development

Innovative Models for Sustainable Development in Emerging African Countries Rajendra Singh Adhikari,Corinna Rossi,Stefano Della Torre,2020-10-08 This open access book explores key issues and presents recent case studies in areas of importance for the transition to a circular model of development in emerging African countries that will minimize resource consumption and waste production The topics covered include the development of sustainable housing models energy and environmental issues in building design and technical systems recycling for a sustainable future models for humanitarian emergencies and low cost and web based digital tools with applications in architecture and archaeology The aim is to contribute to a necessary paradigm shift with respect to urban planning and usage of territories moving from a linear urban metabolism based on the take make dispose approach to a circular metabolism Such a change requires a focus on the relationship between the architectural urban and physical aspects of new developments climate and energy demand as well as the identification and integration of strategies and infrastructures to achieve a high level of efficiency and self sufficiency The book will appeal to all with an interest in sustainable development in the African context This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use All rights not granted by the work's license are retained by the author or authors

The Imperatives of Sustainable Development Erling Holden,Kristin Linnerud,David Banister,2026-02-16 Taking the ethical foundations from the seminal UN Report 1987 Our Common Future this revised and updated second edition builds a model that emphasizes three equally important moral imperatives satisfying human needs ensuring social justice and respecting environmental limits

Computational Models in the Economics of Environment and Development A.K. Duraiappah,2003-12-31 Computational Models in the Economics of Environment and Development provides a step by step guide in designing developing and solving non linear environment development models It accomplishes this by focusing on applied models using real examples as case studies Additionally it gives examples of developing policy interventions based on quantitative model results Finally it uses a simple computer program GAMS to develop and solve models This book is targeted towards university lecturers and students in economic modeling and sustainable development but is also of particular interest to researchers at sustainable development research institutes and policy makers at international sustainable development policy institutions such as the World Bank UNDP and UNEP
