Companion to Contemporary Architectural Thought Ben Farmer,Dr Hentie J Louw,Hentie Louw,Adrian Napper,2003-09-02 Architecture has attracted increasing worldwide attention in recent years not only because of its cultural significance but also because of concern over the performance and resource implications of buildings 101 in depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints Please contact your representative for a leaflet detailing full contents and contributors It also includes sample pages and several illustrations from the book American Architects and Texts Juan Pablo Bonta,1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects **Use Matters** Kenny Cupers,2013-10-15 From participatory architecture to interaction design the question of how design accommodates use is driving inquiry in many creative fields Expanding utility to embrace people s everyday experience brings new promises for the social role of design But this is nothing new As the essays assembled in this collection show interest in the elusive realm of the user was an essential part of architecture and design throughout the twentieth century Use Matters is the first to assemble this alternative history from the bathroom to the city from ergonomics to cybernetics and from Algeria to East Germany It argues that the user is not a universal but a historically constructed category of twentieth century modernity that continues to inform architectural practice and thinking in often unacknowledged ways

Region Simon Richards,Robert Schmidt III,Cagri Sanliturk,Falli Palaiologou,2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region

and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them
