Forbes, Syed M. Ahmed, 2010-10-13 During the past several decades the manufacturing and service industries significantly increased their levels of productivity quality and profitability through the application of process improvement techniques and information

technology. Unfortunately the construction industry lags far behind in the application of performance improvement and optimization techniques as well as its overall competitiveness. Written by Lincoln H. Forbes and Syed M. Ahmed, both highly regarded for leadership and innovation. *Modern Construction Lean Project Delivery and Integrated Practices* offers cutting edge lean tools and other productive strategies for the management of people and processes in the construction industry. Drs. Forbes and Ahmed focus mainly on lean construction methodologies such as The Last Planner® System, The Lean Project Delivery System™ and Integrated Project Delivery™. The tools and strategies offered draw on the success of the world renowned Toyota Production System (TPS) adapted to the construction environment by construction professionals and researchers involved in developing and advocating lean construction methods. The book also discusses why true lean construction can best occur when all the construction stakeholders (owners, designers, constructors, and material suppliers) are committed to the concept of optimizing the flow of activities holistically while de-emphasizing their self-interest. The authors also reintroduce process improvement approaches such as TQM and Six Sigma as a foundation for the adoption of lean methodologies and demonstrate how these methods can improve projects in a so-called traditional environment. The book integrates these methods with emerging interest in green construction and the use of information technology and Building Information Modeling (BIM) while recognizing the human element in relation to motivation, safety, and environmental stresses. Written specifically for professionals in an industry that desperately needs to play catch up, the book delineates cutting edge approaches with the benefit of successful cases and explains how their deployment can improve construction performance and competitiveness.

Lean Project Delivery and Integrated Practices in Modern Construction Lincoln H. Forbes, Syed M. Ahmed, 2020-04-01. *Lean Project Delivery and Integrated Practices in Modern Construction* is the new and enhanced edition of the pioneering book *Modern Construction* by Lincoln H. Forbes and Syed M. Ahmed. This book provides a multi-faceted approach for applying lean methodologies to improve design and construction processes. Recognizing the wide diversity in the landscape of projects and encompassing private and public sector activity (buildings and infrastructure), the book expands upon the detailed coverage of integrated project delivery and new lean tools and techniques to include: Greater emphasis on the importance of creating a lean culture and the initiatives required to transform the industry; Expanded discussions of the foundational writings in lean construction theory; Exploration of the synergies between lean and green initiatives; Specific procedures for modifying planning and scheduling activities to improve the performance of the project team; Expanded sections on quality and topics that have become a part of the lean lexicon such as: Choosing by Advantages, line of balance, location based scheduling, virtual design teams, takt time planning, and set based design; Discussion questions for beginners and advanced lean practitioners; and Improved cross referencing within the text to help the reader navigate the frameworks, techniques and tools to support the application of lean principles. The techniques described here enhance the use of resources, reducing waste, minimizing delays, increasing quality and reducing overall costs. They enable practitioners to

improve the quality of the built environment secure higher levels of customer owner satisfaction and simultaneously improve their profitability This book is essential reading for all those wanting to be at the forefront of construction management and lean thinking
