Transportation Safety in an Age of Deregulation Leon N. Moses, Ian Savage, 1989-12-14 Recent legislation deregulating the airline and trucking industries has enhanced competition and reduced real transportation prices by putting pressure on firms to operate more efficiently Yet with the entry of many new small airlines and trucking firms facing the financial pressures of competition many legislators fear that public safety will be reduced due to compromises in maintenance equipment replacement recruitment and training This volume examines the theoretical and empirical issues involved in the debate on the relationship between safety and economic performance in the airline and trucking industries Contributors discuss such factors as the role of government as provider of safety oversight personnel and airport and road space quality and conclude that the government has not acted quickly enough to provide the additional safety resources to meet the changed needs of the two industries though the evidence does not support the notion that deregulation has compromised safety Best Practice in Islamic Geometric Design Eric Broug, 2019-01-30 What can we learn from 1 400 years of design excellence What rules and conventions have guaranteed consistent quality for centuries across the Islamic world Eric Broug looks at a wide range of visual evidence and codifies these rules he reveals the design practices of traditional builders how to scale a composition how to create an engaging composition how to innovate etc This book shows how it was done it shows how to apply best practice now and it shows the most common problems in contemporary Islamic geometric design and how to avoid them **New Pencil Points** Eugene Clute, Russell Fenimore Whitehead, Kenneth Reid, Elizabeth L.
