**Making Physics** Robert P. Crease,1999 From Nobel Prize winning work in atomic physics to community concerns over radiation leaks Brookhaven National Laboratory s ups and downs track the changing fortunes of big science in the United States since World War II But Brookhaven is also unique it was the first major national laboratory built specifically for basic civilian research In *Making Physics* Robert P Crease brings to life the people the instruments the science and the politics of Brookhaven s first quarter century *Research in Building Physics* J. Carmeliet,H. Hens,G. Vermeir,2003-01-01 This text provides a broad view of the research performed in building physics at the start of the 21st century The focus of this conference was on combined heat and mass flow in building components performance based design of building enclosures energy use in buildings sustainable construction users comfort and health and the urban micro climate *Research in Building Physics and Building Engineering* Paul Fazio,Hua Ge,Jiwu Rao,Guylaine Desmarais,2020-11-25 Buildings influence people They account for one third of energy consumption across the globe and represent an annual capital expenditure of 7% 10% of GNP in industrialized countries Their lifetime operation costs can exceed capital investment Building Engineering aims to make buildings more efficient safe and economical One branch of this discipline Building Physics Science has gained prominence with a heightened awareness of such phenomena as sick buildings the energy crisis and sustainability and considering the performance of buildings in terms of climatic loads and indoor conditions The book reflects the advanced level and high quality of research which Building Engineering and Building Physics Science in particular have reached at the beginning of the twenty first century It will be a valuable resource to engineers architects building scientists consultants on the building envelope researchers and graduate students *Model Making for Young Physicists* Alan Davidson Bulman,1963

*the progress of physics* ,1980 *Theoretical Concepts in Physics* Malcolm S. Longair,2020-04-16 In this original and integrated approach to theoretical reasoning in physics Malcolm Longair illuminates the subject from the perspective of real physics as practised by research scientists Concentrating on the basic insights attitudes and techniques that are the tools of the modern physicist this approach conveys the intellectual excitement and beauty of the subject Through a series of seven case studies an undergraduate course in classical physics and the discovery of quanta are reviewed from the point of the view of how the great discoveries and changes of perspective came about This approach illuminates the intellectual struggles needed to attain understanding of some of the most difficult concepts in physics Longair s highly acclaimed text has been fully revised and includes new studies on the physics of fluids Maxwell s great paper on equations for the electromagnetic field and problems of contemporary cosmology and the very early universe **An Anthropology of Learning** Cathrine Hasse,2014-12-05 This book has one explicit purpose to present a new theory of cultural learning in organisations which combines practice based learning with cultural models a cognitive anthropological schema theory of taken for granted connections tied to the everyday meaningful use of artefacts The understanding of culture as emerging in a process of

learning open up for new understandings which is useful for researchers practitioners and students interested in dynamic studies of culture and cultural studies of organisations The new approach goes beyond culture as a static essentialist entity and open for our possibility to learn in organisations across national cultures across ethnicity and across the apparently insurmountable local educational differences which makes it difficult for people to communicate working together in an increasingly globalized world The empirical examples are mainly drawn from organisations of education and science which are melting pots of cultural encounters

**Numerical methods for diffusion phenomena in building physics** Nathan

Mendes,Marx Chhay,Julien Berger,Denys Dutykh,2017-05-19 This book intends to stimulate research in simulation of diffusion problems in building physics by first providing an overview of mathematical models and numerical techniques such as the finite difference and finite element methods traditionally used in building simulation tools Then nonconventional methods such as reduced order models boundary integral approaches and spectral methods are presented which might be considered in the next generation of building energy simulation tools The advantage of these methods includes the improvement of the numerical solution of diffusion phenomena especially in large domains relevant to building energy performance analysis
