

Choosing the Right Organizational Model for Team Autonomy

Feature		Networked organization	Agile & tribes	Holacracy
1	 Team autonomy	Varies; autonomy depends on network node structure	High, within sprints and team goals	Very high, roles and circles self-govern
2	 Decision-making	Often shared; depends on local team setup	Product Owner/Scrum Master roles guide priorities	Distributed through structured governance
3	 Structure	Fluid, team-of-teams model with overlapping roles	Squads, tribes, chapters, guilds	Role- and circle-based with no traditional hierarchy
4	 Best suited for	Cross-functional collaboration across business areas	Rapid development, product teams, iterative work	Values-driven orgs, adaptable operations, flat hierarchies
5	 Key challenge	Coordination overhead and unclear accountability	Scaling consistency across teams	Complex to adopt and sustain

Models Of Autonomy:

Models of Autonomy YÄ´rÄ¼m DinÄ¼á¹ein, In 1938 Eliezer Yapou *The Theory and Practice of Autonomy* Gerald Dworkin, 1988-08-26 This important new book develops a new concept of autonomy The notion of autonomy has emerged as central to contemporary moral and political philosophy particularly in the area of applied ethics professor Dworkin examines the nature and value of autonomy and uses the concept to analyse various practical moral issues such as proxy consent in the medical context paternalism and entrapment by law enforcement officials Models and Mirrors Don Handelman, 1998 Ritual is one of the most discussed cultural practices yet its treatment in anthropological terms has been seriously limited characterized by a host of narrow conceptual distinctions One major reason for this situation has been the prevalence of positivist anthropologies that have viewed and summarized ritual occasions first and foremost in terms of their declared and assumed functions By contrast this book which has become a classic investigates them as epistemological phenomena in their own right Comparing public events a domain which includes ritual and related occasions the author argues that any public event must first be comprehended through the logic of its design It is the logic of organization of an occasion which establishes in large measure what that occasion is able to do in relation to the world within which it is created and practiced

Taking the Measure of Autonomy Suzy Killmister, 2017-09-08 This book takes a radically different approach to the concept of autonomy Killmister defends a theory of autonomy that is four dimensional and constituted by what she calls self definition self realisation self unification and self constitution While sufficiently complex to inform a full range of social applications this four dimensional theory is nonetheless unified through the simple idea that autonomy can be understood in terms of self governance The self of self governance occupies two distinct roles the role of personal identity and the role of practical agency In each of these roles the self is responsible for both taking on and then honouring a wide range of commitments One of the key benefits of this theory is that it provides a much richer measure not just of how autonomous an agent is but also the shape or degree of her autonomy Taking the Measure of Autonomy will be of keen interest to professional philosophers and students across social philosophy political philosophy ethics and action theory who are working on autonomy Cultures of Infancy Heidi Keller, 2022-05-26 The Classic Edition of Heidi Keller s Cultures of Infancy first published in 2007 includes a new introduction by the author which describes for readers the original context of her work how she has further developed her research and thinking and the ongoing relevance of this volume in the context of future challenges for the field In its original volume Cultures of Infancy presented the first systematic analysis of culturally informed developmental pathways synthesizing evolutionary and cultural psychological perspectives for a broader understanding of human development In this compelling book Heidi Keller utilizes ethnographic reports as well as quantitative and qualitative analyses to illustrate how humans resolve universal developmental tasks in particular sociodemographic contexts These contexts are represented in cultural models with three distinct models addressed

throughout the text the model of independence with autonomy as developmental organizer the model of interdependence with relatedness as the developmental organizer and the model of autonomous relatedness representing particular mixtures of autonomy and relatedness The book offers an empirical examination of the first integrative developmental task during the early months of life relationship formation Keller shows that early parenting experiences shape the basic foundation of the self within particular models of parenting that are influenced by culturally informed socialization goals With distinct patterns of results that the studies have revealed Cultures of Infancy helps redefine developmental psychology as part of a culturally informed science based on evolutionary groundwork Scholars interested in a broad perspective on human development and culture will benefit from this pioneering volume

industrialized countries there is a sharp increase of the aging population due to a decrease in fertility rate and an increase in life expectancy Due to which the age dependency ratio rises and may cause increased economic burden among working age population One strategy to combat this problem is to prolong peoples working career A sufficient work ability is a requirement for a sustainable and prolonged employment Work ability is primarily a question of balance between work and personal resources Personal resources change with age whereas work demands may not change parallel to that or only change due to globalization or new technology Work ability on average decreases with age although several different work ability pathways exist during the life course Work related factors as well as general lifestyle may explain the declines and improvements in work ability during aging A sustainable work ability throughout the life course is a main incentive for a prolonged working career and a healthy aging Work ability and work related factors are therefore important occupational and public health issues when the age of the population increases This Special Issue Sustainable Work Ability and Aging includes in all 16 original articles and one opinion paper organized in three sections The research topics cover wide aspects

of work ability from determinants older employee s coping with their work methodological issues as well as results of interventions on promoting work ability

Dynamics in Logistics Michael Freitag,Hans-Dietrich Haasis,Herbert Kotzab,Jürgen Pannek,2020-04-15 Since 2007 the biennial International Conferences on Dynamics in Logistics LDIC offers researchers and practitioners from logistics operations research production industrial and electrical engineering as well as from computer science an opportunity to meet and to discuss the latest developments in this particular research domain From February 12th to 14th 2020 for the seventh time LDIC 2020 is held in Bremen Germany Similar to its six predecessors the Bremen Research Cluster for Dynamics in Logistics LogDynamics organizes this conference The spectrum of topics reaches from the dynamic modeling planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber physical production and logistics systems LDIC 2020 provides a forum for the discussion of advances in that matter The conference program consists of three invited keynote speeches and 51 papers selected by a severe double blind reviewing process Within these proceedings all the papers are published By this the proceedings give an interdisciplinary outline on the state of the art of dynamics in logistics as well as identify challenges and solutions for logistics today and tomorrow

Monographs of the Society for Research in Child Development Joscha Kärtner,2012 The goal of the study was to trace the development of mirror self recognition MSR as an index of toddlers sence of themselves and others as autonomous intentional agents in different sociocultural environments They hypothesized that the onset of MSR would be earlier in sociocultural contexts in whilch mothers value and support their toddlers development of autonomy Also considered were three factors that covary with culture that may compromise the cross cultural validity of MRS as a behavioral measure of toddlers sense of themselves as independent agents familiarity with mirrors culture specific norms of expressive behavior and motivation for tactile exploration Finally they analyzed toddlers reactions to their specular image e g pointing playmate and experimenting behavior across time and culture as well as their relation to MSR The results indicate that MSR increased with age in all sociocultural contexts from abstract
